

I Strongly Urge The FCC Not to pursue the reversal of Title II Net Neutrality. Without the Strong "Net Neutrality" policies backed by the FCC, ISP's, Politicians, and Corporations will find ways to stifle small companies, individuals, and the freedom of speech and free press.

As you can clearly see the 'Bots have been at work parroting FCC chairman Ajit Pai's message. Please Listen to the People, We want to keep the protections that we currently have, and if any changes are to be made at a future date, then present those changes to the people before adopting the changes.

Please don't erode our freedom of speech (through modern communication), by taking away Title II 'Net Neutrality'.
