RE: MB Docket No 05-311

In the Matter of Implementation of Section 621(a)(1) of the Cable Communications Policy Act of 1984 as Amended by the Cable Television Consumer Protection and Competition Act of 1992

We are writing in support of the Comments of the Cable Act Preservation Alliance ("CAPA") in the Second Further Notice of Proposed Rule Making. We oppose the tentative conclusions the FCC reaches in the proceeding because of their impacts on our community.

I am one of many in our community who has benefited for many years from our community access cable television. It's not just the learning in studio that I've seen is so important. We have many folks in our community who cannot access important events in our community. The only way for them to access the information provided at these meetings and events is through community access television. If this valuable resource is cut you will be limiting the rights of so many to the freedom of information that this provides.

This benefit for people was intended when Congress set up the Cable Act. PEG Access does not solely benefit a local government or franchising authority: It benefits and strengthens the community as a whole. By allowing cable operators to reduce franchise fee support for local communities if they opt for local channels, the FNPRM diminishes the ability of PEG channels to serve communities such as ours. We ask that it not be adopted.

Thank you.

Yours truly,

DocuSigned by:
