

Consumers have spoken loud and clear, they want net neutrality to remain and I'm in agreement with them.

I used to work for a major telecom corporation and my experience there has made it clear that they cannot be trusted with unrestrained power over the internet. Removing the protections granted to us is a faulty decision based on a flawed ideology that has been disproven multiple times over the past 30 years.

I want the internet to remain neutral. Please vote to keep neutrality in place. Thank you.
