Re: CBRS Transition Wavier Docket#18-353

To: Chief, Wireless Telecommunications Bureau

Our company recently invested \$500k in 3650-3700 MHz. We are small provider currently servicing customers in the rural market in East Texas with speeds up to 25Mbps. We SUPPORT the extension of the transition deadline.

The current deadline leaves an unreasonable time restraint to install compliant equipment, creating budget and scheduling concerns for our small company. With the January 2023 extension create less impact on our operations and resources by spreading the cost over 4 years.

Thank you,

Stephen Lash
