

The **Home Town Network Inc**
Lake Placid, Florida

December 12, 2018

To: Federal Communications Commission
Re: Docket No. 18-353

The Home Town Network Inc. was established in 1997 to provide Internet service to rural Highlands County Florida. In 2005 we began deployment of a Fixed Wireless network and by 2010 we acquired a license to operate Part 90 equipment. We have a major investment in our wireless network and specifically Part 90 systems.

Because of the slower than expected development of Part 96 compliant systems, it's unlikely that we would be able to complete the required conversion by the current deadline. This would almost certainly cause loss of service to many customers.

For this reason we support WISPA's petition for waiver to operate Part 90 devices until January 8, 2023.

Respectfully,

Steven M. Bastardi
President
