<b>Brief Comment</b>	Dear Chairman Pai, I'm very concerned about Net Neutrality and Title II. I would like to recommend the Federal Communications Commission to rescind Tom Wheeler's scheme to control the web. People like me, not Washington bureaucrats, should be empowered to use the products they choose. Tom Wheeler's scheme to control the web is a betrayal of the open Internet. It reversed a light-touch framework that worked very, very successfully for two decades with nearly universal consensus.
