

**SANTOS AND BONET
EXHIBIT 1**

S T A T E M E N T
OF
LOURDES RODRIGUEZ BONET

Introduction

My name is Lourdes Rodriguez Bonet. I currently reside at Marina Bahia Plaza, 9 RB 35, Catana, Puerto Rico 00632. I was born on April 22, 1958 in San Juan, Puerto Rico. I have resided in Puerto Rico since birth. I graduated from high school and I received a degree in 1980 from the University of Puerto Rico in Business Administration with a major in accounting. I have been employed since college graduation in various business/accounting positions. I am currently employed in the accounting department of Dover Elevator Company in San Juan. I am Hispanic.

I, along with my husband, Lloyd Santiago-Santos, filed an application for a new FM station at Culebra, Puerto Rico. We are 50/50 partners in this venture and will share equally the overall responsibility for the venture. The marital partnership will permit us to participate together in the Culebra venture and bring our respective talents to the enterprise.

FEDERAL COMMUNICATIONS COMMISSION

Docket No. 44-38861-100 Exhibit No. 100

Presented by Central Intelligence Agency

Date 5/1/52

Integration Into Management

I will serve as the general manager of the radio station should our application be granted. As the general manager, I will have overall responsibility for the day-to-day operations of the station. As general manager of a small start-up station, I will supervise overall performance of all station employees in their assigned duties.

My duties will include establishment of procedures and policies for running the station including programming, personnel, EEO policies, billing and financial controls. I, as general manager, will be the principal liaison between the station and the community. As such, I will oversee the continuing ascertainment of community needs and the formulation of programming to meet those needs.

I will terminate any then employment should our application be granted so that I can devote full-time (at least 40 hours per week) to my duties as general manager of the Culebra station. I will also relocate to Culebra should our application be granted. Termination of any employment and relocation will be accomplished no later than the beginning of program test authority for the station.

Diversification

I am the owner of 33 1/3% in Santiago Communications, Inc. publisher of a monthly medical newspaper in the northern part of Puerto Rico from Vega Alta to Isabela. The

paper is distributed for free. In the event that our application is granted, I will divest this interest. It will be offered first to the remaining stockholder (other than Lloyd Santiago-Santos) of Santiago Communications. The matter has been discussed with him and it is anticipated that he will exercise his right to acquire this interest. In the event that he does not acquire the interest, it will be offered to other interested parties. Divestiture will be completed by the beginning of program test authority. Other than the above referenced media interests, I hold no other interests in any AM, FM or TV broadcast station, daily newspaper, cable television system, advertising agency or other media of mass communication.

Past Broadcast Experience

In addition to my general business background, I worked at radio station WQBS, San Juan, Puerto Rico from 1980 to late 1981. At the station I worked in the accounting/business office. My duties involved me in all aspects of station financial operations. I prepared invoices which involved examination of station logs for spot runs. I also coordinated the calculation of sales commissions with the sales department.

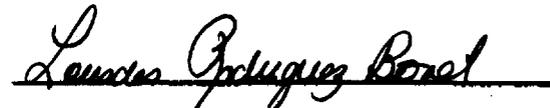

Auxiliary Power

We will establish an auxiliary generator at the transmitter site to ensure continued operations in the event of the failure of the commercial power source. The radio facility will be designed in such a way that broadcasts can be accomplished from the transmitter site in the event of power failure so that there will be no requirement for an auxiliary power source at the studio location if it is different from the transmitter site.
