MM Docket 93-177

C O M M E N T

Now comes Miller Communications, Inc., licensee of WTIM (AM) Taylorville, Illinois, in support of proposed AM rule changes in MM Docket 93-177.

These proposed rule changes are the biggest changes in AM rules in nearly 50 years. With current FCC AM antenna performance methods being outdated, adopting new techniques will lower operational costs and improve accuracy.

Many of the nation's leading engineers support these changes, and Miller Communications, Inc. agrees with these changes. Being an AM directional radio station, we heartily believe the proposed AM rule changes in MM docket 93-177 will provide for better improved measurement methods and in many cases, better coverage.

We support MM docket 93-177 and ask that the proposed AM rule changes be implemented.

Respectfully submitted,

MILLER COMMUNICATIONS, INC.
