Issued: November 21, 1994 ; Released: November 23, 1994

Under consideration is a "Petition For Leave To Amend" filed October 27, 1994 by Community Educational Association (CEA).

CEA seeks to amend its application to report its receipt of an Acknowledgement of Notice of Proposed Construction or Alteration with respect to its proposed site. The FAA has determined that the proposed construction would exceed FAA's obstruction standards and that further aeronautical study is necessary to determine whether it would be a hazard to air navigation. CEA recites that it has requested the FAA to conduct a further study to determine the maximum height CEA can build its tower at that site and not be an air hazard. The petition for leave to amend will be granted and the proffered amendment will be accepted for Section 1.65 purposes. <sup>1</sup>

SO ORDERED.
