Reply to: CC Docket No. 94-102 RM-8143

To whom it may concern,

In regards to the revisions of the Commission's rules to ensure compatibility with enhanced 911 emergency calling systems: It is our, Dean Technologies, belief that our company is currently distributing a product known as D-TARS that would comply with the demands of the enhanced 911 emergency systems. This product is currently being distributed to handle the changes occurring in the North American Numbering Plan for Mitel brand name PBX switch owners. This product is also capable of conforming to the demands placed on PBX users by the enhanced 911 emer. call. system.

Therefore, the monetary burden placed upon Mitel end users would be approximately \$2700.00. It is my belief that other brands of equipment could be upgraded for similar dollar amounts. With this understanding, it might calm the concerns of the financial burden placed upon end users.

Regards,

Scott Colbert
Regional Sales Manager
Dean Technologies
