FCC MAIL ROOM

Dear Chairman Hundt:

We, the undersigned members of the California State Legislature, believe that continued rate and entry regulation of cellular telephone services in this state is not in the public interest. The competitive wireless marketplace, marked by the entry of multiple new licensees, provides a far better mechanism for delivering quality services and lower prices than the cumbersome regulatory process.

As representatives of the California electorate, we urge you to reject the California PUC's petition. PUC regulation has resulted in higher rates for cellular services and contributed to greater government expenditures. Continued rate authority by the PUC over this dynamic industry will result in less investment, less jobs, and a less robust market.

We seek to improve California's economy and business climate. Eliminating unnecessary regulation over cellular rates will serve that end.
