DOCKET FILE COPY ORIGINAL

Dear Sirs,

I am Completely Against the petition recently brought before the FCC that would eliminate the one way information bulletins and Morse Code practice. It cannot be considered "Broadcast Context" because these one way bulletins are Amateur Radio related information very important to the Amateur Radio community. Please do not consider this petition. If it would go into effect it would hinder the prospective amateur from copying CW that would help one get their Amateur License and also those going for a higher license class.

Thank You
Rod Huckabay
