Re: RM-8653

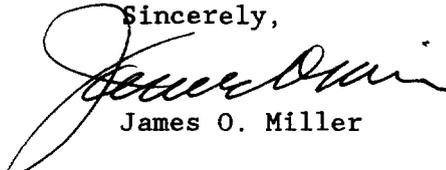

DOCKET FILE COPY ORIGINAL

Dear Sir,

This petition is one of the most creative proposals for use of the Public's airwaves to come before the Commission in recent memory. Instead of proposing the licensing of public property for private gain, RM-8653 opens a portion of the radio band spectrum to unfettered, but organized, public use. It should be supported without equivocation.

I hope, for once, our government can work in the public's interest and set aside a significant portion of the radio bandwidth for public use as outlined in RM-8653. Thank you.

Sincerely,

James O. Miller

Dear Mr. Caton,

DOCKET FILE COPY ORIGINAL

I am writing because I would like to stress how important it would be to have a public spectrum. I support the petition from Apple Computer. A free public spectrum would allow people to have access to services they normally couldn't because running wires might be cost prohibitive. As one Internet citizen put it: "Pollution-free, environmentally-sound, wire-free regional electronic public parks." The phone companies will try to lobby for the same band but please listen to the citizens not the huge corporations. So please turn over the 300 MHz of spectrum to the public.

Sincerely,

*Brent Deverman*

Re: RM-8653, Apple NII Band Petition

DOCKET FILE COPY ORIGINAL

Dear Mr. Canton,

I am writing to let your agency know that I support the Apple NII Band Petition to the FCC, RM-8653.

Making this portion of the spectrum available for public access could have an unimagineable positive impact on the American economy, society and standard of living.

It is extremely important that this portion of the spectrum not become a toll road.

Sincerely,

Rick Strobel
