FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

The Honorable Reed Hundt
Federal Communications Commission
1919 "M" Street, NW - Suite 814
Washington, DC 20554

Dear Commissioner Hundt:

The Pennsylvania Nurses Association understands that the FCC is about to consider a proposal that would directly harm the safety of millions of Americans who wear hearing aids. The proposal deals with new digital phone technology that tens of millions of Americans will be using in the future. The FCC must consider options that will be suitable to meet their needs too. These Americans with hearing aids need to be a part of this new technology and must not be subjected to ear-piercing noise when using it.

The Pennsylvania Nurses Association strongly urges the FCC to be sure that this new technology will be hearing-aid compatible. Please protect millions of hearing-aid users and let them be a part of this wave of the future, the same as all other Americans.

It is the hope of the Pennsylvania Nurses Association that the FCC makes an ethical decision, one in the best interest of the hearing-aid users.

Sincerely,

Jessie F. Rohner, DrPH, RN
Executive Administrator

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

DOCKET FILE COPY ORIGINAL

To: Federal Communications Commission
From: James F. McDonald, General Minister, VCC
Date: July 12, 1995

The Virginia Council of Churches would be seriously concerned about any proposal that would directly harm the safety of millions of Americans, seniors, children and adults who wear hearing aids. We understand that you are considering new digital phone technology that tens of millions of Americans will be using in the future.

So that Americans with hearing aids can also be a part of the new technology and not subjected to ear piercing noise when using it, it is imperative that the FCC to consider options that will be suitable to meet their needs, too.

As General Minister of the Virginia Council of Churches, and in consideration of the thousands of Virginians who are hearing impaired, I would urge the FCC to be sure that this new technology is hearing aid compatible. Please protect millions of hearing aid users and let them be a part of this wave of the future the same as all other Americans.

Thank you.
