FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D.C. 20541

I am writing in support of FCC petition RM-8653. I believe that it represents an important step in making wireless communications available to all the citizens of the this country, not simply those with the big bucks to spend on high-priced gadgets. Please help to manage the use of the airwaves in the public interest by moving forward with the proposal.

Thank you,

Warren Bowman

re: case no. RM-863

Dear Secretary,

I just learned of the request of Apple Computer to allow wireless computer communication access to a large part of the radio spectrum. I strongly support this request and urge that you grant that petition. It is exciting to think of how much the free or inexpensive exchange of information could enhance the democratic process and our democracy.

Sincerely

Willard Draisin
