

Southern Co. launches LINC wireless network

FROM OUR STAFF AND NEWS SERVICES

Southern Co., seeking to expand beyond its traditional electric utility business, today unveils a new wireless communications network that is being marketed to companies across the Southeast.

The company will demonstrate the Southern LINC system at a briefing at SciTrek, the science museum in downtown Atlanta. Similar demonstrations are planned for later this month across the region.

Southern has spent \$200 million to develop a wireless network to dispatch road crews and other service vehicles for its five utilities that include Georgia Power Co. The hand-held digital technology was developed jointly with Motorola Inc.

Since the beginning of this year, Southern has been offering excess capacity in the network to companies such as ambulance

services, construction companies and taxi companies. But today's briefing marks the official launch of the project.

Robert G. Dawson, president of Southern Communications Services Inc., the subsidiary that is developing the new service, said outside customers are expected to account for about 70 percent of the unit's revenues by the end of 1996. The unit is expected to break even in 1997 and begin contributing to Southern Co. earnings by 1998, he said.

Eventually, Dawson said, Southern hopes to expand the use of two-way communications into office and sales settings. "We are bringing a white-collar image to two-way radio," he said.

Southern last month began testing a new service that combines cable TV, telephone, Internet access, remote-monitored security and energy management services.

CERTIFICATE OF SERVICE

I, Rochelle L. Pearson, hereby certify that on this 16th day of April 1996, I caused a copy of the attached Opposition to Petitions for Reconsideration of Nextel Communications, Inc. to be served by hand delivery or first-class mail, postage prepaid to the following:
