FCC MAIL ROOM

Dear Secretary,

Enclosed is a copy of my letter to our Homeowners Association attorney who I believe misrepresented the fact that he was representing our Association and or alluded too our desire to have him include us as one of the Association he represents.

Personally I think what the FCC is doing referring to IB Docket No. 95-59- Pre-Exemption of Local Zoning Regulation of Satellite Earth Stations is great and should have been done a long time ago, Homeowners Associations (HOA) have become too restrictive and that is probably the reason why I've been elected President of our HOA to help relax some of the covenants. I wish you "Gods Speed" with getting the legislation passed and hope you are successful.

Sincerely,

Joseph D. Harab, President

FCC MAIL ROOM

Dear Mr. Schild,

On May 7th, 1996 I received a copy of a letter which bares your signature referencing the Telecommunications Act of 1996 and its impact on Pre-emption of Association Covenants. I am un-aware of anyone from this Association asking you to draft this letter on our behalf, further I take exception to your eluding to the fact that you are representing us as one of your clients on this issue and respectfully request that in the future you check with our Association and its Board of Directors before taking such action. While our covenants currently preclude the installation of Satellite Dishes, I personally welcome the change and feel that in todays modern life style of living the appearance of a Satellite Dish is not offensive. I hope the FCC is successful in establishing legislation which would allow people the "freedom " to receive broadcast via Satellite. I hope you are not billing us for this work and I would like the details of our client - attorney relationship.

Respectfully,

Joseph D. Harab, President
