Federal Communications Commission
Office of Secretary

Re: ET Docket No. 94-124
RM-8784
Sky Station International, Inc.

Dear Ambassador Mirré:

Thank you for your letter of May 21, 1996 regarding the proposal of Sky Station International, Inc. to establish a Global Stratospheric Telecommunications Service in the bands 47.2-47.5 GHz and 47.9-48.2 GHz.

Sky Station's petition, together with its application for authority to construct and operate the proposed service, are currently under consideration by the Commission. Your helpful insights on the benefits that such a new service could provide to developing countries in their efforts to improve the environment have been placed in the record of our rule making proceeding and will assist us in the resolution of this matter.

Again, we appreciate your informative comments on this matter.

Sincerely Yours,

Donald H. Gips
Bureau Chief
