Chairman, Federal Communications Commission  
Mr. Reed Hundt  
1919 M St. NW  
Washington, D. C. 20554-0001

Dear Chairman,

I oppose the plans to convert from analog to **digital**. I believe that the present analog system should be upgraded rather than an entire phase in of HDTV digital signal transmission. Most consumers do not have a 35" or larger TV in their living room and do not want such a large unit. In most cases the costs will be prohibitive for all Americans to convert.

It is my contention that the present analog transmission can be improved upon and that the digital transmission should be afforded to satellite subscribers for those that desire state of the art transmission. Those that desire digital should be the ones to pay for that luxury rather than all of Americas consumers.

Sincerely,

  
Charles E. Veasey
