

INTERLATA CARRIER SELECTION

- ◆ RBOC PSP participation in selection of interLATA carriers is in the public interest
- ◆ Creates “level playing field” for all PSPs
 - RBOC PSPs can provide one stop shopping
 - RBOC PSPs can aggregate toll for small businesses
- ◆ Location providers/consumers benefit
 - Significant reduction in “carrier slamming”
 - Consumers will have rate predictability -- “no surprises”
 - Competitive impact on OSP will improve rates
- ◆ Adequate safeguards protect against cross-subsidies and discrimination

INTRALATA CARRIER SELECTION

- ◆ All PSPs should be able to participate in selection of intraLATA carriers
- ◆ Dialing parity not required for Section 276
 - Not technically feasible to apply to payphone on a stand alone basis
 - Independent PSPs already have the functional equivalent of dialing parity with “smart” payphones

PUBLIC INTEREST PAYPHONES

- ◆ The requesting party should fund public interest payphones
- ◆ California plan is unique to California
 - Grandfather the California plan at the request of Pacific Bell

OTHER ISSUES

- ◆ Semi-public payphones should be detariffed and deregulated
- ◆ AT&T payphones must also be deregulated to create market parity
- ◆ Letterless keypads should not be allowed

GLOSSARY

- Dial Around -** Calls placed from a payphone to a carrier using an access code (e.g., 1-800-CALLATT, 1-800-COLLECT, 10XXX, 950-XXXX)
- Default Rate -** A transitional rate, which prevails in the absence of a negotiated agreement, but from which the parties by agreement may depart
- Primary Economic Beneficiary -** The carrier that prices, bills for, and receives revenue from the call
