I am just now using the Internet. As a teacher I implore you to keep the lines of communication open and affordable. Just as newspapers are available inexpensively to all, the internet should be as well.

Subject: Phone Companies

Dear Sirs:

I certainly hope you do not allow the phone companies to charge those that use the internet for pleasure. It's one of the few things we get to do without paying through the nose for or pay taxes on. The phone companies make more then enough as it is, they definitely do not need a piece of the action when it comes to internet use.....

Thank you for your time.

Sincerely,

Mary Byrd

Subject: I am writing in regards to the utility companies request

I am writing in regards to the utility companies request to charge for internet access. I think we all pay the utility companies enough already for service. They should not be allowed to charge for internet access as well. And if the measure allowing them to charge for internet access is passed what next???

regards
Pat.B.

p.s. Don't we already pay necessary fees to maintain phone lines with our regular bills????

I hope it was a mistake that I heard the FCC is planning on charging for use of online time.

If it was not a mistake, please take this moment to reconsider the consequences and try to think about more than the POCKETBOOK.

Please do NOT approve major phone companies petitions to charge Internet users a fee, much like long distance, to use their telephone lines for all their on-line time.

Thank you for your consideration.
