**8.2 Public Access Line (PAL) Service**

(M)

<b>8.2.1 Description</b>	
A.	PAL which is for use with Customer Owned Coin Operated / Coinless Telephones (COCOT), is a class of main telephone exchange service offered to business customers for use by the general public or the combined use of the customer and his patrons.
B.	PAL is provided from the Telephone Company's central office up to and including the network interface located at the customer's premises or other customer arranged location and is provided only where suitable central office facilities are available.
C.	Curb A Charge which provides originating number screening and terminating number screening may be provided at rates and charges specified in Section 7 when the COCOT customer subscribes to a compatible Interexchange Carrier (IC).

<b>8.2.2 Regulations</b>	
A.	Customers with PAL are subject to all tariff regulations which apply to customers with one-party business service including those for resale and sharing specified in Section 1.
B.	The customer is responsible for all rates and charges originating from or accepted at this service.
C.	A telephone number change may be required if a customer changes from semipublic telephone service to PAL.
D.	Telephone equipment used with PAL must be registered in compliance with Part 68 of the FCC's Registration Program.
E.	The customer must conform to any applicable rules and regulations established by the Public Utilities Commission which include the following: all customer owned coin operated / coinless telephones must have access to Directory Assistance service (411), Universal Emergency Number service (911) where offered, and be clearly marked as to ownership, rates, telephone number, repair reporting number, and operational instructions for local and toll calling.

**8.1 Public Access Smartline (PASL) Service**

(N)

<b>8.1.1 Definitions</b>	
	<b>Dial Tone First</b> —Enables end users to dial certain calls without requiring coin deposits, (e.g. Universal Emergency Number service).
	<b>Originating Number Screening-Operator Screening</b> —Alerts the operator that operator handled calls and operator handled directory assistance calls may not be billed to the originating number. Calls may be placed on a calling card, collect or charge to a third number basis.
	<b>Selective Blocking</b> —Blocks calls to 550, 554, 900, 920, 940 and 976.
	<b>Terminating Number Screening</b> —Alerts operators throughout the country that collect and third number calls cannot be billed to a particular number.

<b>8.1.2 Description</b>	
A.	PASL is a class of main telephone exchange service offered to payphone providers for use by the general public. PASL is provided as Basic Coin Access Line-1, Basic Coin Access Line-2, Inmate and Charge-A-Call. This service is available in suitably equipped central offices where sufficient facilities exist.
B.	In exchanges where measured PASL service is unavailable, unlimited PASL service may be provided. When measured PASL service becomes available in an exchange, all unlimited PASL service will be automatically converted to measured PASL service.

<b>8.1.3 Responsibility of the Payphone Provider</b>	
A.	Payphone providers that subscribe to PASL service are subject to all tariff regulations which apply to customers with one-party business exchange service including those for resale and sharing specified in Section 1.
B.	The payphone provider is responsible for all rates and charges originating from or accepted at this service.
C.	The payphone provider must conform to any applicable rules and regulations established by the Massachusetts D.P.U. which include the following: all customer owned coin operated/ coinless telephones must have access to Directory Assistance service (411) (with the exception of Inmate service), Universal Emergency Number service (911) where offered, and be clearly marked as to ownership.

(N)

**New England Telephone and Telegraph Company**

<b>8.1.4 Service Components</b>	
A.	<p><b>BCAL 1 and BCAL 2</b> are comprised of a network access line with dial tone first capability, coin functionalities and blocking features.</p> <ol style="list-style-type: none"> <li>1. The network access line is measured and BCAL 1 is arranged for one way (outgoing) calling and BCAL 2 is arranged for two way (incoming and outgoing) calling.</li> <li>2. The coin functionality features consist of coin timing and rating of sent paid end user calls and coin signaling. Coin signaling is used to control the disposition of the coins held in the pay telephone and consists of coin collect and coin return. Coin collect is used when a call has been completed and coin return is used if a no answer or busy condition is encountered.</li> <li>3. The blocking features consist of originating number screening-operator screening, terminating number screening and selective blocking.</li> </ol>
B.	<p><b>Inmate</b> is comprised of a network access line and blocking features.</p> <ol style="list-style-type: none"> <li>1. The network access line is measured, arranged for one way (outgoing) calling and provides for originating collect calls only to areas within the North American Dialing Plan. The North American Dialing Plan consists of the continental United States, Alaska, Hawaii, Canada, those parts of Mexico in the 903 Area Code, Bermuda, Puerto Rico, the Virgin Islands, and other Caribbean Islands in the 809 Area Code.</li> <li>2. The blocking features consist of originating number screening-operator screening and terminating number screening. End users do not have access to Directory Assistance Service.</li> </ol>
C.	<p><b>Charge-A-Call</b> is comprised of a network access line and blocking features.</p> <ol style="list-style-type: none"> <li>1. The network access line is measured, arranged for one way (outgoing) calling and provides for collect, charge to third telephone number, or charge to Calling Card calls on an originating basis only.</li> <li>2. The blocking features consist of originating number screening-operator screening and terminating number screening.</li> </ol>

<b>8.1.5 Coin Timing and Rating—PASL Payphone Users</b>	
A.	<p><b>Local Service 617/508 LATA</b>—Payphone-user local service usage is timed, rated and billed on a message unit basis. The minimum initial period per local service message is two message units.</p> <ol style="list-style-type: none"> <li>1. For the determination of message unit areas and initial period message units applicable for calls within these areas for Metropolitan Boston exchanges and for message unit calls between the Burlington, Lynn, and Saugus exchanges and all Metropolitan Boston exchanges, refer to Exhibit 8.3.1-1. For all other exchanges (including calls from the Burlington, Lynn and Saugus exchanges to exchanges outside Metropolitan Boston), calls within the primary calling area of each exchange are charged on an initial period two message unit basis. For primary calling areas, refer to Section 5.</li> <li>2. For message units the initial period is five minutes for one or two unit messages, three minutes for three through five unit messages. The overtime period is five minutes for one unit messages, three minutes for two-unit messages and on minute for three through five unit messages. For each of the overtime periods, one message unit applies. In those central offices where facilities are not available for the timing of messages, overtime charges do not apply.</li> <li>3. Message Telecommunication Service (MTS) timing and rating applies for messages to exchanges or localities not included in the message unit area.</li> </ol>
B.	<p><b>Local Service 413 LATA</b>—Calls within the primary calling area of the serving exchange are rated on an initial period and overtime basis. The initial period charge is for the first five minutes. Overtime charges are for each additional three minutes or fraction thereof.</p> <ol style="list-style-type: none"> <li>1. MTS timing and rating applies for messages to exchanges or localities not included in the primary calling area.</li> </ol>
C.	<p>In addition to the local service charges, an incremental charge applies when the calling party places a local sent-paid call by dialing "0" for operator and the operator dials the called party's telephone number. This incremental charge does not apply in the following situations.</p> <ol style="list-style-type: none"> <li>1. When an operator places a call for a calling party who identifies himself as being handicapped and unable to dial the call because of the handicap.</li> <li>2. When an operator re-establishes a call that was interrupted after the called number was reached.</li> <li>3. When an operator reaches the called telephone number where facilities are not available for customer dial completion.</li> </ol>
