International (HF) Broadcast (47 CFR Part 73)	280	390

FY 1997 GUIDELINES FOR REGULATORY FEE CATEGORIES

1. The guidelines below provide an explanation of regulatory fee categories established by the Schedule of Regulatory Fees in section 9 (g) of the Communications Act, 47 U.S.C. § 159(g) as modified in the instant Report and Order. Where regulatory fee categories need interpretation or clarification, we have relied on the legislative history of section 9, our own experience in establishing and regulating the Schedule of Regulatory Fees for Fiscal Years (FY) 1994 and 1995 and the services subject to the fee schedule, and the comments of the parties in our proceeding to adopt fees for FY 1995. The categories and amounts set out in the schedule have been modified to reflect changes in the number of payment units, additions and changes in the services subject to the fee requirement and the benefits derived from the Commission's regulatory activities, and to simplify the structure of the schedule. The schedule may be similarly modified or adjusted in future years to reflect changes in the Commission's budget and in the services regulated by the Commission. See 47 U.S.C. § 159(b)(2), (3).

2. Exemptions. Governments and nonprofit entities are exempt from paying regulatory fees and should not submit payment. A nonprofit entity may be asked to submit a current IRS Determination Letter documenting that it is exempt from taxes under Section 501 of the Internal Revenue Code or the certification of a governmental authority attesting to its nonprofit status. The governmental exemption applies even where the government-owned or community-owned facility is in competition with a commercial operation. Other specific exemptions are discussed below in the descriptions of other particular service categories.

1. Private Wireless Radio Services

3. Two levels of statutory fees were established for the Private Wireless Radio Services -- exclusive use services and shared use services. Thus, licensees who generally receive a higher quality communication channel due to exclusive or lightly shared frequency assignments will pay a higher fee than those who share marginal quality assignments. This dichotomy is consistent with the directive of Section 9, that the regulatory fees reflect the benefits provided to the licensees. See 47 U.S.C. § 159(b)(1)(A). In addition, because of the generally small amount of the fees assessed against Private Wireless Radio Service licensees, applicants for new licenses and reinstatements and for renewal of existing licenses are required to pay a regulatory fee covering the entire license term, with only a percentage of all licensees paying a regulatory fee in any one year. Applications for modification or assignment of existing authorizations do not require the payment of regulatory fees. The expiration date of those authorizations will reflect only the unexpired term of the underlying license rather than a new license term.

a. Exclusive Use Services

4. Private Mobile Radio Services (PMRS) (Formerly Land Mobile Services): Regulatees in this category include those authorized under Part 90 of the Commission's Rules to provide limited access Wireless Radio service that allows high quality voice or digital communications between

vehicles or to fixed stations to further the business activities of the licensee. These services, using the 220-222 MHz band and frequencies at 470 MHz and above, may be offered on a private carrier basis in the Specialized Mobile Radio Services (SMRS).¹¹⁶ For FY 1997, we are proposing that PMRS licensees will pay a \$10 annual regulatory fee per license, payable for an entire five or ten year license term at the time of application for a new, renewal, or reinstatement license.¹¹⁷ The total regulatory fee due is either \$50 for a license with a five year term or \$100 for a license with a 10 year term.

5. Microwave Services: These services include private and commercial microwave systems and private and commercial carrier systems authorized under Part 101 of the Commission's Rules to provide telecommunications services between fixed points on a high quality channel of communications. Microwave systems are often used to relay data and to control railroad, pipeline, and utility equipment. Commercial systems typically are used for video or data transmission or distribution. For FY 1997, we are proposing that Microwave licensees will pay a \$10 annual regulatory fee per license, payable for an entire ten year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is \$100 for the ten year license term.

6. Interactive Video Data Service (IVDS): The IVDS is a two-way, point-to-multi-point radio service allocated high quality channels of communications and authorized under Part 95 of the Commission's Rules. The IVDS provides information, products, and services, and also the capability to obtain responses from subscribers in a specific service area. The IVDS is offered on a private carrier basis. The Commission does not anticipate receiving any applications in the IVDS during FY 1997. Therefore, for FY 1997, we are proposing that there be no regulatory fee established for IVDS licensees.

b. Shared Use Services

7. Marine (Ship) Service: This service is a shipboard radio service authorized under Part 80 of the Commission's Rules to provide telecommunications between watercraft or between watercraft and shore-based stations. Radio installations are required by domestic and international law for large passenger or cargo vessels. Radio equipment may be voluntarily installed on smaller vessels, such as recreational boats. The Telecommunications Act of 1996 gave the Commission the authority to license certain ship stations by rule rather than by individual license. Private boat operators sailing entirely within domestic U.S. waters and who are not otherwise required by treaty or agreement to carry a radio, are no longer required to hold a marine license, and they will not be required to pay a regulatory fee. For FY 1997, we are proposing that parties required to be licensed and those choosing to be licensed for Marine (Ship) Stations will pay a \$5 annual regulatory fee per station, payable for an entire ten-year

¹¹⁶ This category only applies to licensees of shared-use private 220-222 MHz and 470 MHz and above in the Specialized Mobile Radio (SMR) service who have elected not to change to the Commercial Mobile Radio Service (CMRS). Those who have elected to change to the CMRS are referred to paragraph 14 of this Attachment.

¹¹⁷ Although this fee category includes licenses with ten-year terms, the estimated volume of ten-year license applications in FY 1997 is less than one-tenth of one percent and, therefore, is statistically insignificant.

license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is \$50 for the ten year license term.

8. Marine (Coast) Service: This service includes land-based stations in the maritime services, authorized under Part 80 of the Commission's Rules, to provide communications services to ships and other watercraft in coastal and inland waterways. For FY 1997, we are proposing that licensees of Marine (Coast) Stations will pay a \$5 annual regulatory fee per call sign, payable for the entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is \$25 per call sign for the five-year license term.

9. Private Land Mobile (Other) Services: These services include Land Mobile Radio Services operating under Parts 90 and 95 of the Commission's Rules. Services in this category provide one- or two-way communications between vehicles, persons or fixed stations on a shared basis and include radiolocation services, industrial radio services, and land transportation radio services. For FY 1997, we are proposing that licensees of services in this category will pay a \$5 annual regulatory fee per call sign, payable for an entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is \$25 for the five-year license term.

10. Aviation (Aircraft) Service: These services include stations authorized to provide communications between aircraft and between aircraft and ground stations and include frequencies used to communicate with air traffic control facilities pursuant to Part 87 of the Commission's Rules. The Telecommunications Act of 1996 gave the Commission the authority to license certain aircraft radio stations by rule rather than by individual license. Private aircraft operators flying entirely within domestic U.S. airspace and who are not otherwise required by treaty or agreement to carry a radio are no longer required to hold an aircraft license, and they will not be required to pay a regulatory fee. For FY 1997, we are proposing that parties required to be licensed and those choosing to be licensed for Aviation (Aircraft) Stations will pay a \$5 annual regulatory fee per station, payable for the entire ten-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee due is \$50 per station for the ten-year license term.

11. Aviation (Ground) Service: This service includes stations authorized to provide ground-based communications to aircraft for weather or landing information, or for logistical support pursuant to Part 87 of the Commission's Rules. Certain ground-based stations which only serve itinerant traffic, i.e., possess no actual units on which to assess a fee, are exempt from payment of regulatory fees. For FY 1997, we are proposing that licensees of Aviation (Ground) Stations will pay a \$5 annual regulatory fee per license, payable for the entire five-year license term at the time of application for a new, renewal, or reinstatement license. The total regulatory fee is \$25 per call sign for the five-year license term.

12. General Mobile Radio Service (GMRS): These services include Land Mobile Radio licensees providing personal and limited business communications between vehicles or to fixed stations for short-range, two-way communications pursuant to Part 95 of the Commission's Rules. For FY 1997, we are proposing that GMRS licensees will pay a \$5 annual regulatory fee per license, payable for an entire five-year license term at the time of application for a new,

renewal or reinstatement license. The total regulatory fee due is \$25 per license for the five-year license term.

c. Amateur Radio Vanity Call Signs

13. Amateur Vanity Call Signs: This fee covers voluntary requests for specific call signs in the Amateur Radio Service authorized under part 97 of the Commission's Rules. For FY 1997, we are proposing that applicants for Amateur Vanity Call-Signs will pay a \$5 annual regulatory fee per call sign, payable for an entire ten-year license term at the time of application for a vanity call sign. The total regulatory fee due would be \$50 per license for the ten-year license term.¹¹⁸

d. Commercial Wireless Radio Services

14. Commercial Mobile Radio Services (CMRS) Mobile Services: The Commercial Mobile Radio Service (CMRS) is an "umbrella" descriptive term attributed to various existing services authorized to provide interconnected mobile radio services for profit to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public. CMRS Mobile Services include certain licensees which formerly were licensed as part of the Private Radio Services (e.g., Specialized Mobile Radio Services) and others formerly licensed as part of the Common Carrier Radio Services (e.g., Public Mobile Services and Cellular Radio Service). While specific rules pertaining to each covered service remain in separate Parts 22, 24, 80 and 90, general rules for CMRS are contained in Part 20. CMRS Mobile Services will include: qualifying Business Radio Services, 220-222 MHz Land Mobile Systems, Specialized Mobile Radio Services (Part 90);¹¹⁹ Personal Communications Services (Part 24), Public Coast Stations (Part 80); Public Mobile Radio (Cellular, 800 MHz Air-Ground Radiotelephone, and Offshore Radio Services) (Part 22). Each licensee in this group will pay an annual regulatory fee for each mobile or cellular unit (mobile or cellular call sign or telephone number), including two-way paging units, assigned to its customers, including resellers of its services. For FY 1997, we are proposing that the regulatory fee be \$.24 per unit.

15. Commercial Mobile Radio Services (CMRS) One-Way Paging Services: The Commercial Mobile Radio Service (CMRS) is an "umbrella" descriptive term attributed to various existing services authorized to provide interconnected mobile radio services for profit to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public. CMRS One-Way Paging Services include certain licensees which formerly were licensed as part of the Private Radio Services (e.g., Private Paging), licensees formerly licensed as part of the

¹¹⁸ Section 9(h) exempts "amateur radio operator licenses under Part 97 of the Commission's rules (47 CFR Part 97)" from the requirement. However, Section 9(g)'s fee schedule explicitly includes "Amateur vanity call signs" as a category subject to the payment of a regulatory fee.

¹¹⁹ This category does not include licensees of private shared-use 220 MHz and 470 MHz and above in the Specialized Mobile Radio (SMR) service who have elected to remain non-commercial. Those who have elected not to change to the Commercial Mobile Radio Service (CMRS) are referred to paragraph 4 of this Attachment. Further, Congress provided for a three year transition period until August 10, 1996, for conversion to CMRS. See Omnibus Budget Reconciliation Act of 1993, Public Law 103-66, Title VI § 6002(b), 107 Stat. 312,392. Therefore, licensees who had not converted to CMRS prior to December 31, 1995, are not subject to the CMRS Mobile Services fee for FY 1996.

Common Carrier Radio Services (e.g., Public Mobile One-Way Paging), and licensees of Personal Communications Service (PCS) one-way paging. While specific rules pertaining to each covered service remain in separate Parts 22, 24 and 90, general rules for CMRS are contained in Part 20. We have replaced the Public Mobile One-Way Paging regulatory fee category with a CMRS One-Way Paging Services category for regulatory fee collection purposes. Each licensee in the CMRS One-Way Paging Services will pay an annual regulatory fee for each paging unit assigned to its customers, including resellers of its services. For FY 1997, we are proposing that the regulatory fee be \$.03 per unit.

2. Mass Media Services

16. The regulatory fees for the Mass Media fee category apply to broadcast licensees and permittees. Noncommercial Educational Broadcasters are exempt from regulatory fees.

a. Commercial AM and FM Radio

17. These categories include licensed Commercial AM (Classes A, B, C, and D) and FM (Classes A, B, B1, C, C1, C2, and C3) Radio Stations operating under Part 73 of the Commission's Rules.¹²⁰ We are proposing that the regulatory fees for AM and FM Stations for FY 1997 are as follows:

AM Radio	
Class A	\$1,750
Class B	965
Class C	390
Class D	480
FM Radio	
Classes C, C1, C2, B	\$1,750
Classes A, B1, C3	1,050

b. Construction Permits - Commercial AM Radio

18. This category includes holders of permits to construct new Commercial AM Stations. For FY 1997, we are proposing that permittees will pay a fee of \$195 for each permit held. Upon issuance of an operating license, this fee would no longer be applicable and licensees would be required to pay the applicable fee for the designated class of the station.

c. Construction Permits - Commercial FM Radio

19. This category includes holders of permits to construct new Commercial FM Stations. For FY 1997, we are proposing that permittees will pay a fee of \$965 for each permit held. Upon

¹²⁰ The Commission acknowledges that certain stations operating in Puerto Rico and Guam have been assigned a higher level station class than would be expected if the station were located on the mainland. Although this results in a higher regulatory fee, we believe that the increased interference protection associated with the higher station class is necessary and justifies the fee.

issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a regulatory fee based upon the designated class of the station.

d. Commercial Television Stations

20. This category includes licensed Commercial VHF and UHF Television Stations covered under Part 73 of the Commission's Rules, except commonly owned Television Satellite Stations, addressed separately below. Markets are Nielsen Designated Market Areas (DMA) as listed in the Television & Cable Factbook, Stations Volume No. 64, 1996 Edition, Warren Publishing, Inc. We are proposing that the fees for each category of station are as follows:

VHF Markets 1-10.....	\$44,700
VHF Markets 11-25.....	30,500
VHF Markets 26-50.....	16,350
VHF Markets 51-100.....	4,925
VHF Remaining Markets.....	835
UHF Markets 1-10.....	\$18,875
UHF Markets 11-25.....	15,625
UHF Markets 26-50.....	8,250
UHF Markets 51-100.....	2,875
UHF Remaining Markets.....	815

e. Commercial Television Satellite Stations

21. We are proposing that commonly owned Television Satellite Stations in any market (authorized pursuant to Note 5 of Section 73.3555 of the Commission's Rules) that retransmit programming of the primary station be assessed a fee of \$975 annually. Those stations designated as Television Satellite Stations in the 1996 Edition of the Television and Cable Factbook are subject to the fee applicable to Television Satellite Stations. All other television licensees are subject to the regulatory fee payment required for their class of station and market.

f. Construction Permits - Commercial VHF Television Stations

22. This category includes holders of permits to construct new Commercial VHF Television Stations. For FY 1997, we are proposing that VHF permittees will pay an annual regulatory fee of \$7,750. Upon issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a fee based upon the designated market of the station.

g. Construction Permits - Commercial UHF Television Stations

23. This category includes holders of permits to construct new UHF Television Stations. For FY 1997, we are proposing that UHF Television permittees will pay an annual regulatory fee of \$5,950. Upon issuance of an operating license, this fee would no longer be applicable. Instead, licensees would pay a fee based upon the designated market of the station.

h. Construction Permits - Satellite Television Stations

24. We are proposing that the fee for UHF and VHF Television Satellite Station construction permits for FY 1997 be \$350. An individual regulatory fee payment is to be made for each Television Satellite Station construction permit held.

i. Low Power Television, FM Translator and Booster Stations, TV Translator and Booster Stations

25. This category includes Low Power UHF/VHF Television stations operating under Part 74 of the Commission's Rules with a transmitter power output limited to 1 kW for a UHF facility and, generally, 0.01 kW for a VHF facility. Low Power Television (LPTV) stations may retransmit the programs and signals of a TV Broadcast Station, originate programming, and/or operate as a subscription service. This category also includes translators and boosters operating under Part 74 which rebroadcast the signals of full service stations on a frequency different from the parent station (translators) or on the same frequency (boosters). The stations in this category are secondary to full service stations in terms of frequency priority. We have also received requests for waivers of the regulatory fees from operators of community based Translators. These Translators are generally not affiliated with commercial broadcasters, are nonprofit, non-profitable, or only marginally profitable, serve small rural communities, and are supported financially by the residents of the communities served. We are aware of the difficulties these Translators have in paying even minimal regulatory fees, and we have addressed those concerns in the ruling on reconsideration of the FY 1994 Report and Order. Community based Translators are exempt from regulatory fees. For FY 1997, we are proposing that licensees in low power television, FM translator and booster, and TV translator and booster category will pay a regulatory fee of \$225 for each license held.

j. Broadcast Auxiliary Stations

26. This category includes licensees of remote pickup stations (either base or mobile) and associated accessory equipment authorized pursuant to a single license, Aural Broadcast Auxiliary Stations (Studio Transmitter Link and Inter-City Relay) and Television Broadcast Auxiliary Stations (TV Pickup, TV Studio Transmitter Link, TV Relay) authorized under Part 74 of the Commission's Rules. Auxiliary Stations are generally associated with a particular television or radio broadcast station or cable television system. This category does not include translators and boosters (see paragraph 26). For FY 1997, we are proposing that licensees of Commercial Auxiliary Stations will pay a \$25 annual regulatory fee on a per call sign basis.

k. Multipoint Distribution Service

27. This category includes Multipoint Distribution Service (MDS), and Multichannel Multipoint Distribution Service (MMDS), authorized under Part 21 of the Commission's Rules to use microwave frequencies for video and data distribution within the United States. For FY 1997, we are proposing that MDS and MMDS stations will pay an annual regulatory fee of \$215 per call sign.

3. Cable Services

a. Cable Television Systems

28. This category includes operators of Cable Television Systems, providing or distributing programming or other services to subscribers under Part 76 of the Commission's Rules. For FY 1997, we are proposing that Cable Systems will pay a regulatory fee of \$.55 per subscriber.¹²¹ Payments for Cable Systems are to be made on a per subscriber basis as of December 31, 1995. Cable Systems should determine their subscriber numbers by calculating the number of single family dwellings, the number of individual households in multiple dwelling units, e.g., apartments, condominiums, mobile home parks, etc., paying at the basic subscriber rate, the number of bulk rate customers and the number of courtesy or fee customers. In order to determine the number of bulk rate subscribers, a system should divide its bulk rate charge by the annual subscription rate for individual households. See FY 1994 Report and Order, Appendix B at Paragraph 31.

b. Cable Antenna Relay Service

29. This category includes Cable Antenna Relay Service (CARS) stations used to transmit television and related audio signals, signals of AM and FM Broadcast Stations, and cablecasting from the point of reception to a terminal point from where the signals are distributed to the public by a Cable Television System. For FY 1997, we are proposing that licensees will pay an annual regulatory fee of \$65 per CARS license.

4. Common Carrier Services

a. Domestic Public Fixed Radio Service

30. This category includes licensees in the Point-to-Point Microwave Radio Service, Local Television Transmission Radio Service, and Digital Electronic Message Service, authorized under Part 101 of the Commission's Rules to use microwave frequencies for video and data distribution within the United States. These services are now included in the Microwave category (see paragraph 5 above).

b. Interstate Telephone Service Providers

31. This category includes Inter-Exchange Carriers (IXCs), Local Exchange Carriers (LECs), Competitive Access Providers (CAPs), domestic and international carriers that provide operator services, Wide Area Telephone Service (WATS), 800, 900, telex, telegraph, video, other switched, interstate access, special access, and alternative access services either by using their own facilities or by reselling facilities and services of other carriers or telephone carrier holding companies, and companies other than traditional local telephone companies that provide interstate access services to long distance carriers and other customers. This category also

¹²¹ Cable systems are to pay their regulatory fees on a per subscriber basis rather than per 1,000 subscribers as set forth in the statutory fee schedule. See FY 1994 Report and Order at Paragraph 100.

includes pre-paid calling card providers. These common carriers, including resellers, must submit fee payments based upon their proportionate share of gross interstate revenues using the methodology that we have adopted for calculating contributions to the TRS fund. See Telecommunications Relay Services, 8 FCC Rcd 5300 (1993), 58 FR 39671 (July 26, 1993). In order to avoid imposing any double payment burden on resellers, we will permit carriers to subtract from their gross interstate revenues, as reported to NECA in connection with their TRS contribution, any payments made to underlying common carriers for telecommunications facilities and services, including payments for interstate access service, that are sold in the form of interstate service. For this purpose, resold telecommunications facilities and services are only intended to include payments that correspond to revenues that will be included by another carrier reporting interstate revenue. For FY 1997, we are proposing that carriers multiply their adjusted gross revenue figure (gross revenue reduced by the total amount of their payments to underlying common carriers for telecommunications facilities or services) by the factor 0.00119 to determine the appropriate fee for this category of service. Regulatees may want to use the following worksheet to determine their fee payment:

	TOTAL	INTERSTATE
(1) Revenue reported in TRS Fund worksheets		
(2) Less: Access charges paid		
(3) Less: Other telecommunications facilities and services taken for resale		
(4) Adjusted revenues (1)minus(2)minus(3)		
(5) Fee factor		0.00119
(6) Fee due (4)times(5)		

5. International Services

a. Earth Stations

32. Very Small Aperture Terminal (VSAT) Earth Stations, equivalent C-Band Earth Stations and antennas, and earth station systems comprised of very small aperture terminals operate in the 12 and 14 GHz bands and provide a variety of communications services to other stations in the network. VSAT systems consist of a network of technically-identical small Fixed-Satellite Earth Stations which often include a larger hub station. VSAT Earth Stations and C-Band Equivalent Earth Stations are authorized pursuant to Part 25 of the Commission's Rules. Mobile Satellite Earth Stations, operating pursuant to Part 25 of the Commission's Rules under blanket licenses for mobile antennas (transceivers), are smaller than one meter and provide voice or data communications, including position location information for mobile platforms such as cars,

buses, or trucks.¹²² Fixed-Satellite Transmit/Receive and Transmit-Only Earth Station antennas, authorized or registered under Part 25 of the Commission's Rules, are operated by private and public carriers to provide telephone, television, data, and other forms of communications. Included in this category are telemetry, tracking and control (TT&C) earth stations, and earth station uplinks. For FY 1997, we are proposing that licensees of VSATs, Mobile Satellite Earth Stations, and Fixed-Satellite Transmit/Receive and Transmit-Only Earth Stations will pay a fee of \$515 per authorization or registration as well as a separate fee of \$515 for each associated Hub Station.

33. Receive-only earth stations. For FY 1997, we are proposing that there be no regulatory fee for receive-only earth stations.

b. Space Stations (Geosynchronous)

34. Geosynchronous Space Stations are domestic and international satellites positioned in orbit to remain approximately fixed relative to the earth. Most are authorized under Part 25 of the Commission's Rules to provide communications between satellites and earth stations on a common carrier and/or private carrier basis. In addition, this category includes Direct Broadcast Satellite (DBS) Service which includes space stations authorized under Part 100 of the Commission's rules to transmit or re-transmit signals for direct reception by the general public encompassing both individual and community reception. For FY 1997, we are proposing that entities authorized to operate geosynchronous space stations (including DBS satellites) will be assessed an annual regulatory fee of \$98,575 per operational station in orbit. Payment is required for any geosynchronous satellite that has been launched and tested and is authorized to provide service.

c. Low Earth Orbit Satellites (LEOs)

35. Low Earth Orbit Satellite Systems are space stations that orbit the earth in non-geosynchronous orbit. They are authorized under Part 25 of the Commission's rules to provide communications between satellites and earth stations on a common carrier and/or private carrier basis. For FY 1997, we are proposing that entities authorized to operate Low Earth Orbit Satellite Systems will be assessed an annual regulatory fee of \$136,500 per operational system in orbit. Payment is required for any LEO System that has one or more operational satellites.

d. Signatories

36. A Signatory to INMARSAT is an Administration or government, or the telecommunications entity designated as sole operating entity by an Administration or government, which participates in the International Mobile Satellite Organization (INMARSAT) in order to develop and operate a global maritime satellite telecommunication system which serves maritime commercial and safety needs of the United States and foreign countries. A Signatory to INTELSAT is an

¹²² Mobile earth stations are hand-held or vehicle-based units capable of operation while the operator or vehicle is in motion. In contrast, transportable units are moved to a fixed location and operate in a stationary (fixed) mode. Both are assessed the same regulatory fee for FY 1997.

Administration or government, or the telecommunications entity designated as sole operating entity by an Administration or government, which participates in the International Telecommunications Satellite Organization (INTELSAT) in order to develop, construct, operate, and maintain the space segment of the global commercial telecommunications satellite system established under the Interim Agreement and Special Agreement signed by Governments on August 20, 1964. For FY 1997, we are proposing that Signatories to INMARSAT and INTELSAT will be assessed an annual regulatory fee of \$326,025 in order to recover the cost of the Commission's regulatory activities associated with such entities.

e. International Bearer Circuits

37. Regulatory fees for International Bearer Circuits are to be paid by the facilities-based common carriers (either domestic or international) activating the circuit in any transmission facility for the provision of service to an end user or resale carrier. Payment of the fee for bearer circuits by private submarine cable operators is required for circuits sold on an indefeasible right of use (IRU) basis or leased to any customer other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. Compare FY 1994 Report and Order at 5367. The fee is based upon active 64 Kbps circuits, or equivalent circuits. Under this formulation, 64 Kbps circuits or their equivalent will be assessed a fee. Equivalent circuits include the 64 Kbps circuit equivalent of larger bit stream circuits. For example, the 64 Kbps circuit equivalent of a 2.048 Mbps circuit is 30 64 Kbps circuits. Analog circuits such as 3 and 4 KHz circuits used for international service are also included as 64 Kbps circuits. However, circuits derived from 64 Kbps circuits by the use of digital circuit multiplication systems are not equivalent 64 Kbps circuits. Such circuits are not subject to fees. Only the 64 Kbps circuit from which they have been derived will be subject to payment of a fee. For FY 1997, we are proposing that the regulatory fee be \$5.00 for each active 64 Kbps circuit or equivalent. For analog television channels we will assess fees as follows:

Analog Television Channel Size in MHz	No. of equivalent 64 Kbps Circuits
36.....	630
24.....	288
18.....	240

f. International Public Fixed

38. This fee category includes common carriers authorized under Part 23 of the Commission's Rules to provide radio communications between the United States and a foreign point via microwave or HF troposcatter systems, other than satellites and satellite earth stations, but not including service between the United States and Mexico and the United States and Canada using frequencies above 72 MHz. For FY 1997, we are proposing that International Public Fixed Radio Service licensees will pay a \$315 annual regulatory fee per call sign.

g. International (HF) Broadcast

39. This category covers International Broadcast Stations licensed under Part 73 of the Commission's Rules to operate on frequencies in the 5,950 KHz to 26,100 KHz range to provide service to the general public in foreign countries. For FY 1997, we are proposing that International HF Broadcast Stations will pay an annual regulatory fee of \$390 per station license.

Description of FCC Activities

Authorization of Service: The authorization or licensing of radio stations, telecommunications equipment, and radio operators, as well as the authorization of common carrier and other services and facilities. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with authorization activities.¹²³

Policy and Rulemaking: Formal inquiries, rulemaking proceedings to establish or amend the Commission's rules and regulations, action on petitions for rulemaking, and requests for rule interpretations or waivers; economic studies and analyses; spectrum planning, modeling, propagation-interference analyses, and allocation; and development of equipment standards. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with policy and rulemaking activities.

Enforcement: Enforcement of the Commission's rules, regulations and authorizations, including investigations, inspections, compliance monitoring, and sanctions of all types. Also includes the receipt and disposition of formal and informal complaints regarding common carrier rates and services, the review and acceptance/rejection of carrier tariffs, and the review, prescription and audit of carrier accounting practices. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with enforcement activities.

Public Information Services: The publication and dissemination of Commission decisions and actions, and related activities; public reference and library services; the duplication and dissemination of Commission records and databases; the receipt and disposition of public inquiries; consumer, small business, and public assistance; and public affairs and media relations. Includes policy direction, program development, legal services, and executive direction, as well as support services associated with public information activities.

¹²³ Although Authorization of Service is described in this exhibit, it is not one of the activities included as a feeable activity for regulatory fee purposes pursuant to Section 9(a)(1) of the Act. 47 U.S.C. § 159(a)(1).
