RE: CC Docket No. 96-45

Dear Chairman:

I am writing to you in regards to the federal "E-Rate" Telecommunications Discount Program. I am the Superintendent of Anaheim City School District, and I would like to express my strong support for this program and the proposed regulations governing its implementation.

The Telecommunications Act of 1996 and the Federal-State Joint Board discount plan will guarantee that even the poorest schools will have access to the internet and the ability to provide distance-learning opportunities. The \$2.25 billion a year will address the needs of schools across the country, and more importantly, the plan will bring telecommunications services directly to the classrooms, where they can have the greatest impact on students. It is important to remember that each element of this plan is vital to the overall success of the discount program. Therefore, the inclusion of discounts for internal classroom connections should not be eliminated, nor should the size of the Universal Service Fund be reduced. As I am sure you are aware, this program is essential for preparing our students to enter the workforce of tomorrow.

The E-Rate Telecommunications Discount Program is desperately overdue and our students need those discounts for telecommunications services this year. I urge you and the other FCC commissioners to fully support the recommendations of the Joint Board and approve the proposed final regulations regarding the discount plan for universal service for schools and libraries.

Thank you for your consideration of this matter.

Sincerely,

Roberta Thompson
Superintendent

Office of General Counsel

RE: CC Docket No. 96-45

Dear Commissioner Hundt:

I am the Director of Information Technology for the Pennsbury School District in Fallsington, Bucks County, PA.

The Telecommunications Act and the Federal-State Joint Board discount plan will guarantee that all schools have the opportunity to connect to the Information Superhighway and with distance learning opportunities, thus bringing services directly to the classroom where students learn. This plan is essential for preparing the workforce of tomorrow.

Pennsbury School District is embarking on a major technology program that is currently limited by funding. We are unable to address a number of instructional requirements because of the costs necessary to build the infrastructure. We are planning to use the services of the local cable company to connect our 16 buildings, and we hope to use an Internet Service Provider and telecommunication lines to extend Internet to the classrooms. Currently, only one lab and the library in each school have any type of data cabling. The Telecommunications Act of 1996 provides for deep discounts for schools for telecommunication services, and enacting these discounts could make a significant difference in our project. Please recognize the positive impact such discounts could have on the implementation of our technology program. The actions you take at the FCC can considerably assist us in achieving our goals.

Thank you for your commitment to ensuring that all schools and libraries will have affordable access to the Internet. I urge the FCC to fully support the Joint Board's discount plan for universal service for schools and libraries.

Sincerely,

A. Richard Wilson, Interim Director
Information Technology

RE: Docket No. 96-45

Dear Chairman Hundt:

I am the Computer Teacher from the Immaculate Conception School, Diocese of Savannah, and would like to thank you for your dedication in ensuring that all school districts and education consortia will have affordable access to the Information Superhighway.

The Telecommunications Act and the Federal-State Joint Board decision will guarantee that all school districts will have the opportunity to connect to the Internet and provide distance-learning opportunities. The \$2.25 billion a year will address the needs of all our schools, and importantly, the plan will bring services directly into the classroom where students learn. Your inclusion of internal classroom connections for discounts is vital to this process. This plan is also essential in preparing our students for Workforce 2000.

It is the belief of the general population that students attending Catholic schools receive the best of everything. It is true that the quality of a Catholic education is remarkable, yet many of our schools, including this one, are unable to afford to keep up with the recent trends in technology. The discounts would enable us to completely fulfill our educational goals by providing impoverished students with the same opportunities as more affluent public and private schools through exposure to the Internet and other long-distance learning.

Our immediate technological goal at Immaculate Conception is to provide the

Computer Lab, the library, and each classroom with at least one Internet accessible computer. Our research shows that local Internet Providers are willing to install the necessary programs at no charge, and provide monthly service at a nominal fee, but we do not have a single computer with a modem or enough memory to provide us with Internet access. We also are unable to install telephone lines to the classrooms due to a lack of funding. Our ultimate goal is to network our Computer Lab to the individual classrooms, giving teachers and students complete access to educational software available in the lab.

Evidently, our students need deep discounts for telecommunications services this year. The parents, faculty, administration, and friends of Immaculate Conception urge the FCC to fully support the Joint Board's discount plan for universal services to schools. Enclosed is a copy of the petition signed by the members of the Immaculate Conception community, demonstrating our support for the passage of the Telecommunications Act of 1996.

Thank you.

Sincerely,

Vanessa W. Walters

On May 8, 1997, the four FCC Commissioners will vote on giving "E-rates", i.e. educational rates in the implementation of the 1996 Telecommunication Act for schools and libraries. We urge you to support the implementation of the E-rates, and defend the rights of students attending private or parochial schools to have access to the funds and discounts which this act makes available, by signing this petition.

Thank you.

On May 8, 1997, the four FCC Commissioners will vote on giving "E-rates", i.e. educational rates in the implementation of the 1996 Telecommunication Act for schools and libraries. We urge you to support the implementation of the E-rates, and defend the rights of students attending private or parochial schools to have access to the funds and discounts which this act makes available, by signing this petition.

Thank you.
