

#### **4. Demand and Revenue Impacts for Unbundled Features**

##### **4.1 Demand**

**USWC does not expect the introduction of these unbundled features to change the jurisdictional requirements of services provided to pay telephone providers. All pay telephone service provider customers are served by intrastate service offerings. Consequently, the demand forecast for these features in the interstate jurisdiction is zero.**

##### **4.2 Revenue**

**No revenue projections can be calculated because there is no forecasted interstate demand.**

#### **5. Unit Costs for Unbundled Features**

##### **5.1 Overview**

**This section describes the development of regional unit costs in support of the unbundled features' rate elements. Included is a description of the rate elements being proposed for the unbundled features, the processes used to develop the recurring and nonrecurring unit costs, and the workpapers attached.**

## 5.2 Development of Recurring Unit Costs

The recurring unit costs consist of ongoing costs to provide these services. The investments include the material price of equipment, software feature costs, engineering costs and labor to install the features and miscellaneous minor material loadings.

After all components of investment were identified, a per unit investment was derived by dividing by the total inter/intrastate demand figures. Various factors were applied to this unit investment to identify the appropriate capital and operating costs associated with offering each feature. Each factor, when applied to the unit investment or expense (administrative and business fees are applied to expenses rather than investment), produces a per unit amount which should be recovered each year to appropriately cover those costs. The total figure was then divided by twelve to produce a monthly unit cost.

Capital costs are covered through the use of factors which, when applied to investment, produce the annual costs associated with depreciation, earnings and income tax. Depreciation is applied by account code, reflecting the different economic lives of the various types of equipment and plant used to provide services. The earnings or "cost of money" factor represents the return that USWC must pay its investors for the use of their capital. Finally, income tax is the expense associated with taxes that will be incurred on the income earned on the new service.

Operating costs are covered through the use of factors which when applied to investment or expense, produce the annual costs of associated maintenance, right to

use, Ad Valorem taxes, administrative expenses and business fees. Right to use fees cover the ongoing costs of feature use of switch software after the initial investment. Ad Valorem taxes are state level taxes applied at the investment level. Administrative expenses include the costs associated with the line and staff operations which support the new service. Business fees include state level franchise taxes, municipal license fees, occupation taxes and gross receipts taxes.

### 5.3 Development of Nonrecurring Unit Cost

When a customer requests each of the unbundled features, a one time cost to provision the service is incurred. The nonrecurring provisioning rate element recovers these costs as well as the associated cost to disconnect the service at some later date.<sup>5</sup>

The first step taken in developing a nonrecurring cost was to identify the various work groups and tasks required to install and disconnect the service. Next, USWC estimates were used to develop average labor times per task. Once identified, the average labor times were multiplied by the appropriate labor rates to produce the cost per work group. The sum of all the work group costs produces the total nonrecurring cost.

The labor rates used in this study were developed by applying additional factors to cover administrative expense and business fees that are incurred with the new offering. Administrative expenses include the costs associated with the line and staff

---

<sup>5</sup>In the case of ASLS, a portion of the nonrecurring cost is recovered in the recurring rate element.

operations which support the new service. Business fees include state level franchise taxes, municipal license fees, occupation taxes and gross receipts taxes.

#### **5.4 Description of Workpapers**

The recurring unit costs were developed at a regional level. The recurring unit costs are displayed in Workpapers 14 (ASLS), 15 (CUSTOMNET), and 16 (Blocking for 10XXX1+/10XXX011+). Each of these costs is developed on a per line basis. These workpapers display the total unit investment, the capital costs and operating expenses, the total direct unit costs attributable to unit investment, and the total direct unit costs divided by the total unit investment.

Nonrecurring unit costs were developed at a regional level. The nonrecurring unit costs are displayed in Workpapers 17 (ASLS), 18 (CUSTOMNET), and 19 (Blocking for 10XXX1+/10XXX011+).

#### **6. Workpapers**

Act of 1996 )

CC Docket No. 96-128

**AMENDMENT OF PLAN OF U S WEST, INC.  
TO OFFER COMPARABLY EFFICIENT  
INTERCONNECTION FOR PAYPHONE SERVICES**

U S WEST, Inc. ("U S WEST"), pursuant to the Common Carrier Bureau's ("Bureau") Memorandum Opinion and Order and its Clarification Order,<sup>1</sup> hereby amends its Comparably Efficient Interconnection ("CEI") Plan for Payphone Services.<sup>2</sup> Upon the effective date of this Amendment, U S WEST will delete references therein to CUSTOMNET (Outgoing Fraud Protection).

<sup>1</sup> In the Matter of Bell Operating Companies' Joint Petition for Waiver of Computer II Rules, Memorandum Opinion and Order, 10 FCC Rcd. 1724 (1995); In the Matter of Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996, CC Docket No. 96-128, Order, DA 97-678, rel. Apr. 4, 1997 ("Order" or "Clarification Order").

<sup>2</sup> U S WEST's CEI Plan for Payphone Services was approved by the Bureau on Apr. 15, 1997. See In the Matter of U S WEST's Comparably Efficient Interconnection Plan for Payphone Services, Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996, CC Docket No. 96-128, Order, DA 97-796, rel. Apr. 15, 1997.

No. of Copies rec'd  
List A B C D E

024

On Monday, April 14, 1997 U S WEST Communications, Inc., under authority of Special Permission No. 97-125 of the Bureau, removed CUSTOMNET from its payphone compliance tariff filing (Transmittal No. 823). This was done because CUSTOMNET does not fit the criteria in the Bureau's Clarifying Order. In that Order the Bureau clarified that the requirement to file federal tariffs applies only to payphone-specific, network-based, unbundled features and functions provided to others or taken by a LEC's operations, and did not include in this federal tariff requirement features and functions that are generally available to all local exchange customers, such as touchtone and various custom calling features.<sup>3</sup>

CUSTOMNET falls in the latter category because it is a feature generally available to all U S WEST end-user customers and is not payphone-specific. Although utilized by U S WEST's payphone operation in its provision of payphone service, CUSTOMNET is also used by numerous end-user customers other than payphone service providers. Based on March 1997 data, more than 70% of CUSTOMNET lines are residential and business lines, not payphone lines. CUSTOMNET, in these respects is very similar to touchtone service. Consequently, U S WEST need not add CUSTOMNET to its federal tariff to be in compliance with the tariff requirements of the Clarification Order. Thus CUSTOMNET was removed from that filing as described above.

In order to be consistent with its corrected Federal Tariff and accurate in its representations in its CEI Payphone Plan, U S WEST respectfully submits this

---

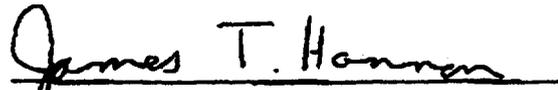

<sup>3</sup> Clarification Order ¶ 18.

request to delete the references to CUSTOMNET in its CEI Payphone Plan, specifically on page 16 of the CEI Plan and in Exhibits A and B. Attached to this Amendment are corrected copies of page 16 and Exhibits A and B. Please replace the previous versions of these pages with the versions that are attached to this Amendment.

Respectfully submitted,

U S WEST, INC.

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF SECRETARY

Re: **Ex Parte**  
Payphone Reclassification Proceeding  
CC Docket No. 96-128  
Order (Common Carrier Bureau, April 4, 1997)

Dear Mr. Caton:

Pursuant to the referenced Order, this is to advise the Commission on the status of intrastate tariffs for unbundled features and functions BellSouth has not yet federally tariffed. A copy of this ex parte letter is being filed with Radhika V. Karmarkar, Esq., of the Commission's Policy and Program Planning Division, in BellSouth's CEI proceeding as required by the Order.

As of this date, there are no payphone-specific, network-based, unbundled features and functions provided to others or taken by BellSouth's payphone operations that are tariffed by BellSouth at the intrastate level. The Order characterizes answer supervision as "pay-phone specific" at paragraph 18. BellSouth does not believe the Order's characterization is correct as to BellSouth because answer supervision is tariffed by BellSouth as a local exchange service for use only with line side terminated PBX trunks in Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.

In Florida, answer supervision is an unbundled feature which is tariffed in the local exchange services tariff and available for use with either IPP lines or line side terminated PBX trunks. Neither BellSouth's payphone affiliate, nor any independent payphone service provider, has ever subscribed to this unbundled, non-payphone-specific feature.

Washington, D.C. 20554

RE: Ex Parte from Ben G. Almond of BellSouth dated April 9, 1997  
Payphone Reclassification Proceeding  
CC Docket No. 96-128. Order (Common Carrier Bureau, April 4, 1997)

Dear Mr. Caton:

I am writing on behalf of the Southeastern Public Communications Coalition ("SPCC")<sup>1</sup> in response to the April 9, 1997 ex parte of Ben G. Almond on behalf of BellSouth in the above referenced matter. The SPCC strenuously disagrees with BellSouth's statement that "as of this date, there are no payphone-specific, network-based, unbundled features and functions provided to others or taken by BellSouth's payphone operations that are tariffed by BellSouth at the intrastate level."

The Order addresses the LEC federal tariffing requirements in two ways. First, it names specific unbundled features that, if tariffed at the state level, "must be federally tariffed." These include "answer supervision, call screening,"<sup>2</sup> "call blocking, coin supervision additive, coin signaling transmission additive, coin rating, original line number screening, and IDDD blocking."<sup>3</sup> The Order also generally requires LECs to tariff all other "payphone specific,

---

<sup>1</sup>The SPCC is a Coalition of public telecommunications associations representing the nine BellSouth states. The members of these state associations include independent PSPs, Operator Service Providers, Long-Distance Carriers, and other telecommunications-related companies operating in each state. Each association acts as an advocate for the public payphone industry and engages in educational, and "self-regulatory" activities to help ensure the responsible provision of pay telephone services to the public.

<sup>2</sup>Order, ¶ 18.

<sup>3</sup>Id., footnote 49.

(Continued . . .)

List ABCDE

Mr. William F. Caton

April 14, 1997

Page 2

network-based, unbundled features and functions provided to others or taken by a LEC's operations. . . .<sup>4</sup> The meaning of the term "payphone-specific" is then clearly delineated:

. . . we do not include in this federal tariffing requirement features and functions that are generally available to all local exchange customers and are only incidental to payphone service, such as touchtone services and various custom calling features. [emphasis added]

BellSouth offers each of the central office blocking and screening features listed in the Order on an unbundled basis in each BellSouth state except Georgia and Florida. BellSouth also offers Billed Number Screening on an unbundled basis in at least Alabama and South Carolina. A copy of the BellSouth's South Carolina tariff for these unbundled features is attached as Exhibit 1.<sup>5</sup>

Inexplicably, BellSouth fails in its ex parte to either mention these unbundled features, or provide the required commitment to federally tariff them. One explanation for this omission may be that BellSouth's intrastate rates for these blocking and screening services are several thousand percent greater than its cost. BellSouth's costs for central office blocking and screening and billed number screening for South Carolina are attached as Exhibit 2. The cost for central office blocking and operator screening per line is only \$ .01 per month. The tariffed monthly rate ranges from \$2.00 to \$4.00. The cost for billed number screening is \$ .026 per inquiry. However, BellSouth properly charges the IXC for these inquiries, so, BellSouth's effective cost to provide billed number screening to IPPs is zero. The tariffed monthly rate for billed number screening is \$1.00.

In addition to BellSouth's glaring omission of its blocking and screening features, its assertions regarding answer supervision are based upon an untenable interpretation of the Order. BellSouth must federally tariff answer supervision since that feature is not "generally available to all local exchange customers." Answer supervision is a specialized product that is more than just "incidental to payphone service." BellSouth's contention that the term "payphone-specific" means "offered exclusively to payphone customers" must be rejected.

The Order requires BellSouth to advise of the "status of the intrastate tariffs for

---

<sup>4</sup>Id., ¶ 18. The listed features that must be federally tariffed also plainly meet this test.

<sup>5</sup>BellSouth also offers Coin Refund and Repair on an unbundled basis in every BellSouth state. While this service is not specifically listed in the Order, it clearly meets the Order's test that requires this feature to be filed at the interstate level.

(Continued . . .)

Mr. William F. Caton  
April 14, 1997  
Page 3

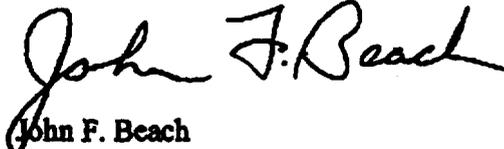

the unbundled features and functions that it has not yet federally tariffed.<sup>6</sup> In this regard, BellSouth fails to advise the FCC that IPPs have initiated proceedings in at least three BellSouth states protesting its rates for the basic payphone line and unbundled features.<sup>7</sup> The petitioners in those proceedings have contended that BellSouth's rates for these services must be significantly reduced in order to be cost based. Furthermore, no Commission in a BellSouth state has conducted the FCC-required review of LEC tariffs for basic payphone lines and unbundled features.<sup>8</sup> These facts, and the cost information attached, present a *prima facie* showing that BellSouth is not entitled to receive dial around compensation as of April 15, 1997.

Based upon BellSouth's indisputable failure to comply with the intrastate and interstate tariffing requirements set forth in the *Payphone Orders*, the SPCC respectfully requests the Commission enter an order declaring that BellSouth is not eligible for dial around compensation. For this same reason, the SPCC also asks for an order rejecting BellSouth's CEI Plan until the Plan fully complies with the Commission's tariffing requirements.

With kind regards, I am

Very truly yours,

BEACH LAW FIRM, P.A.

## A7. COIN TELEPHONE SERVICE

### A7.4 Public Telephone Access Service For Customer Provided Equipment (CPE) (Cont'd)

#### A7.4.2 Responsibility of the Subscriber (Cont'd)

##### C. (Cont'd)

12. Access to the presubscribed interLATA operator may be provided by 00- or 0+ for interLATA calls from each telephone. 00- shall not be used to reach the Company's operator.
13. A telephone directory for the local calling area must be located at the customer-provided pay telephone at all times.

#### A7.4.3 Violations of Regulations

- A. Where any customer-provided telephone is used and/or connected in violation of this Tariff, the Company will promptly notify the customer of the violation.
- B. Failure of the customer to discontinue such use or to correct the violation within ten days may result in the suspension or disconnection of the customer's service upon direction of the Public Service Commission until such time as the customer complies with the provisions of this Tariff.
- C. Any nonpayment of charges billed to the customer by the Company or misuse of tariffed facilities will result in disconnection of the customer's service in accordance with the South Carolina Public Service Commission's Rules and Regulations and other sections of this Tariff.
- D. A charge to reconnect the service when disconnected for a violation of this tariff will apply.

#### A7.4.4 Optional Service Features

##### A. Central Office Blocking with Operator Screening

Central Office Blocking with Operator Screening is offered to provide a choice of restrictions at the subscriber's option. Central Office Blocking with operator screening is offered subject to availability of facilities.

1. Option A - Two-Way Service. No restrictions.
2. Option B - Outward Only Service. No other restrictions.
3. Option C - Two-Way Service. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>
4. Option D - Outward Only Service. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>
5. Option E - Two-Way Service. Provides central office blocking of 7 digit local, 976, 1+DDD and 1+900 calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>
6. Option F - Outward Only Service. Provides central office blocking of 7 digit local, 976, 1+DDD and 1+900 calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>

Note 1: 011+ blocking provides central office blocking of calls to numbers outside the North American Numbering Plans.

(Cont'd)**

**A7.4.4 Optional Service Features (Cont'd)**

**A. Central Office Blocking with Operator Screening (Cont'd)**

7. **Option G - Two-Way Service.** Provides central office blocking of 976, 1+DDD and 1+900 calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>
8. **Option H - Outward Only Service.** Provides central office blocking of 976, 1+DDD and 1+900 calls. Provides screening information to the operator to prevent operator assisted sent-paid calls from being billed to the line. Provides central office blocking of 011+ calls.<sup>1</sup>

**B. Billed Number Screening**

1. Billed Number Screening is provided on an optional basis as provided in A7.4.5.A. of this Tariff.
2. Billed Number Screening provides for the blocking of third number or collect calls which would be billed to Public Telephone Access Service for CPE.
3. Special equipment serving the originating caller's location is required to make this feature operable.

a. Where such equipment is installed:

Call attempts which have been screened will not complete. The operator will advise the calling party that alternate billing arrangements will have to be made before the call can be completed.

b. Where such equipment is not installed:

Call attempts on a third number basis will complete but not bill. THEREFORE, ALL SUBSCRIBERS TO BILLED NUMBER SCREENING ARE ADVISED THAT CALLS SO COMPLETED WILL BE THOROUGHLY INVESTIGATED AS FRAUDULENT CALLS. THE PARTY PLACING THESE CALLS WILL BE EXPECTED TO MAKE FULL RESTITUTION, AND WILL BE LEGALLY RESPONSIBLE FOR THEM.

Call attempts on a collect basis and accepted will be billed. PAYMENT FOR THESE CALLS WILL BE EXPECTED.

**A7.4.5 Rates and Charges**

**A. Public Telephone Access Service for CPE - Rates and Charges applied by the Company**

Public Telephone Access Service for CPE is provided on a Measured Rate basis. Where Area Plus<sup>®</sup> service is available, subscribers to Public Telephone Access Service for CPE may choose network access and a usage option from A7.2.3 for any customer-provided pay telephone whether the local messages are charged at ten cents or twenty-five cents.

**1. Twenty-five Cents Stations**

- a. The following monthly rate is applicable to Public Telephone Access Service for CPE on a per line basis for those telephones from which local messages are charged at twenty-five cents.

(1) Option A

(a) Per line <sup>2</sup>	Monthly Rate	USOC
	\$-	1WA

Note 1: 011+ blocking provides central office blocking of calls to numbers outside the North American Numbering Plan.

Note 2: To the monthly rate shown, add an amount equivalent to eighty percent of the business individual line flat rate.
