The Honorable Rachelle B. Chong, Commissioner  
Federal Communications Commission  
1919 M Street, NW, Room 844  
Washington, D.C. 20554

Dear Commissioner Chong:

RE: CC Docket No. 96-45

I am writing to you in regard to the federal "E-Rate" Telecommunications Discount Program. I am a locally elected school board member from Sierra Sands Unified School District, and I would like to express my strong support for this program and the proposed regulations governing its implementation.

The Telecommunications Act of 1996 and the Federal-State Joint Board discount plan will guarantee that even the poorest schools will have access to the Internet and the ability to provide distance-learning opportunities. The \$2.25 billion a year will address the needs of schools across the country, and more importantly, the plan will bring telecommunications services directly to the classrooms where they can have the greatest impact on students. It is important to remember that each element of this plan is vital to the overall success of the discount program. Therefore, the inclusion of discounts for internal classroom connections should not be eliminated, nor should the size of the Universal Service Fund be reduced. As I am sure you are aware, this program is essential for preparing our students to enter the work force of tomorrow.

The E-Rate Telecommunications Discount Program is desperately overdue, and our students need these discounts for telecommunications services this year. I urge you and the other FCC commissioners to fully support the recommendations of the Joint Board and approve the proposed final regulations regarding the discount plan for universal service for schools and libraries.

Thank you for your consideration of this matter.

Sincerely,

  
John Condos, Clerk  
Board of Education

Rachelle B. Chong, Commissioner  
Federal Communications Commission  
1919 M St. NW, Room 844  
Washington, D.C. 20054

MAY 14 1997

Dear Commissioner Chong:

I write in support of meaningful discounts on telecommunications services for schools and libraries so that every school child and life-long learner can have access to the world of information technology. The Telecommunications Act - through its Universal Service Fund provisions - mandates the development of special discount rates for all schools and libraries so that they can secure services at affordable prices.

There is no doubt that advanced telecommunications services are important to improving learning, sparking the imagination and leveling the playing field for all our nation's people. Affordable access to technology in all classrooms and libraries will assure that our children and life-learners can connect with the technology they would need to compete in today's and tomorrow's workforce. Advanced telecommunications services in the classroom will also create informed and skilled consumers of new technology well into the 21st century. As of now our school system is unable to afford Internet capabilities to extend access to each classroom. Our local telephone company has been reluctant to give our schools reduced rates. We would like for our students to have the same opportunities that are afforded to students in more affluent areas. Without the passage of the Telecommunications Act, there is very little hope that we will ever be able to provide this opportunity.

Last November, the Federal-State Joint Board on Universal Service sent to the Federal Communications Commission (FCC) a set of recommendations for implementing the Universal Service Fund provisions related to the schools and libraries. These recommendations would give our learning institutions significant discounts on all services that are commercially available, with deeper discounts for those schools and libraries least able to pay and more expensive to service. All schools would get discounts on connections to classrooms and Internet connectivity, both of which are essential to providing the most advanced learning opportunities to the greatest number of students.

I urge your support for the Joint Board's recommendations. Taken as a whole, they will provide affordable discounts for a full range of services needed to meet each community's diverse needs. Most importantly, these provisions, if adopted by the FCC, will make advanced technology for learning available to all Americans.

Sincerely,

Mr. + Mrs. James E. Wilkes

Washington, DC 20554

MAY 14 1997

Dear Ms. Toller:

The passage of the Telecommunications Act of 1996 was truly a watershed. Rapid developments in competition, technologies, corporate alignments and regulatory scope are ushering in a new era in this sector. Kaagan Research Associates is updating its annual study of the views of policy makers and other prominent citizens, and we would appreciate the opportunity to hear your perspectives on the current and future shape of telecommunications in our country, and the effects of telecommunications on the economy and the social fabric of America.

Each year since 1985 we have conducted in-depth interviews with several hundred opinion leaders in the government, business, media and non-profit sectors. At the conclusion of our interviews, a synopsis of the highlights of our study is circulated to all participants. Be assured, however, that all interviews (which are conducted in-person and scheduled at your convenience) are strictly confidential, and that neither your name nor the position which you occupy will be cited in any report. There is no particular client sponsoring this study; telecommunications is just one of the many facets of the economy and society that my research firm has studied for many years, often through the method of face-to-face interviews conducted by experienced KRA interviewers.

If I may, I would like to have one of my colleagues contact you in the next week or so to arrange an appointment for an interview. In deference to busy schedules, the interview should take no more than thirty minutes to complete, and we hope you can find the time to share your views with us.

If you have any questions regarding this research, or about our request for an interview, please feel free to call Pat Smith at Kaagan Research:

In New York State, call: 212.246.3551  
Outside of New York State, call: 800.522.4261

Sincerely,

  
Lawrence Kaagan  
President

RE: CCDocket No.96-45

Dear Commissioner Chong:

I am a school board member from Clarence Central School District in Western New York and President of the Clarence Public Library Board of Trustees, and would like to thank you for your dedication in ensuring that all schools will have affordable access to the Information SuperHighway.

The Telecommunications Act and the Federal- State Joint Board discount plan will guarantee that even the poorest schools will have the opportunity to connect to the Internet and provide distance-learning opportunities. The \$2.25 billion a year will address the needs of all of our schools, and importantly, the plan will bring services directly to the classroom where students learn. Your inclusion of internal classroom connection for discounts is vital. This plan is essential for preparing the workforce of tomorrow.

Presently Suburban Clarence has a Distance- Learning classroom that shares teachers and curriculum with both Urban and Inner City classrooms in subjects such as Astronomy, Music Composition, and Wilderness Wise. (A course designed to have students work as teams and become self-reliant and team oriented in the outdoors after classroom training). Another opportunity Distance Learning has provided is our Adult Community Education program with Distance Learning German I and II, and as well as providing a source for Regional Volunteer Firemen Training Sessions.

**With plans in progress for a new Public Library and the construction in progress for a new Media Center at our High School, a Community Technology Committee was established to determine how the Town, the Library and the School can best be served in the 21st Century with Technology. Hopefully the Telecommunications Act funds will provide a resource for facilitating this collaboration.**

We feel we have a unique opportunity to serve all of the stakeholders in our community.

Our students and community need the deep discounts the Joint Board's discount plan will provide for universal service for schools and libraries.

Thank you,

Sincerely yours,

*Jane W. Sweet*

DOCKET FILE COPY ORIGINAL

Dear Commissioner,

There is positive excitement in our school and school district about having access to the Information Superhighway, and using it as a tool to help all children become successful life long learners. I appreciate your committed and dedicated efforts towards the implementation of the affordable E-Rate.

The potential for telecommunication learning and Internet connectivity made available through the Telecommunications Act and the Federal State Joint Board discount plan will ensure that all children have the opportunity to have quality experiences with technology. The funding at its current level will substantially support our school's initiatives and enhance the provision of services in the classroom where technology can be infused into the curriculum and be readily available to all students. Educating children for the 21<sup>st</sup> century will become a reality in direct proportion to the availability of internal classroom connections.

Our technology plan, which emphasizes technology as a valuable resource in teaching and learning and a process for bringing unlimited learning possibilities to students, need the significant discounts for telecommunications services this year. Our schools and libraries must have the FCC to completely support the Joint Board's discount plan for universal service, as without the discount, the cost will prohibit the level of Internet and telecommunication usage required to develop the technology proficiencies of the students and staff.

Sincerely,

Mrs. Frankie Middleton  
Principal

Re: "Luxury" tax on additional phone lines

Dear Mr. Hundt:

I listened in utter disgust as you described the additional phone line I may wish to use in connection with my home or business--- as a "luxury". How dare you or any other pointy-headed, liberal, tax-and-spend bureaucrats define what constitutes a necessity or luxury to me.

Your statement represents a continuation of the nauseating arrogance and condescension I have come to expect from this current administration. Let's see now. A school, or any other entity you deem "worthy", adds an additional phone line, and it is a desirable thing. I, on the other hand, decide to run a second line from my home or business--- and my added line is now a "luxury", subject to a new tax. What a putrid pile of puke you spew.

Reed. Just for the record. There are some so-called luxuries we can do without; namely--- cushy, federal government jobs for near-sighted, narrow-minded, feel-good, wealth-redistribution-specialists like yourself.

In closing. Have a good day. Stay out of my wallet!

Gary, D. Stell

MAY 14 1997

RE: CC Docket No. 96-45

Dear Chairman Hundt:

The Charlotte-Mecklenburg School System works hard to assure that all 93,000 children in Mecklenburg County receive the finest education possible and to prepare them for their future life and work in the 21st century. Classroom connection to the internet is essential for their preparation for the information age.

**I urge you to support the Federal-State Joint Board discount plan.** This will enable even the poorest schools the opportunity to connect to the internet and provide distance-learning opportunities allowing equity in American education.

Thank you for your service to our nation, especially to our students, our future and number one priority.

Sincerely,

Susan Burgess

CC: Docket No. 96-45

Dear Chairman Hundt:

I write in support of meaningful discounts on telecommunications services for schools and libraries so that every school child and life-long learner can have access to the world of information technology. The Telecommunications Act — through its Universal Service Fund provisions — mandates the development of special discount rates for all schools and libraries so that they can secure services at affordable prices.

There is no doubt that advanced telecommunications services are important to improving learning, sparking the imagination and leveling the playing field for all of our nation's people. Affordable access to technology in all classrooms and libraries will assure that our children and life-long learners can connect with the technology they would need to compete in today's and tomorrow's workforce. Advanced telecommunications services in the classroom will also create informed and skilled consumers of new technology well into the 21st century. Also, our school system, Dodge County School System, is in a rural middle Georgia area and most of our children do not have access to telecommunications at home. I feel our children especially would benefit greatly by having this opportunity at their school.

Last November, the Federal-State Joint Board on Universal Service sent to the Federal Communications Commission (FCC) a set of recommendations for implementing the Universal Service Fund provisions related to schools and libraries. These recommendations would give our learning institutions significant discounts on all services that are commercially available, with deeper discounts for those schools and libraries least able to pay and more expensive to service. All schools would get discounts on connections to classrooms and Internet connectivity, both of which are essential to providing the most advanced learning opportunities to the greatest number of students.

I urge your support for the Joint Board's recommendations. Taken as a whole, they will provide affordable discounts for a full range of services, and give schools and libraries flexibility in choosing the services needed to meet each community's diverse needs. Most importantly, these provisions, if adopted by the FCC, will make advanced technology for learning available to all Americans.

Sincerely,

RE: CC Docket No. 96-45

Dear Mr. Hundt:

I am writing to you in regard to the federal "E-RATE" Telecommunications Discount Program. I am a locally elected School Board Member from the Vacaville Unified School District and I would like to express my strong support for this Program and the proposed regulations governing its implementation.

The Telecommunications Act of 1996, and the Federal-State Joint Board Discount Plan will guarantee that even the poorest schools will have access to the Internet and the ability to provide distance-learning opportunities. The \$2.25 billion a year will address the needs of schools across the Country and, more importantly, the plan will bring telecommunications services directly to the classrooms where they can have the greatest impact on students. It is important to remember that each element of this plan is vital to the overall success of the Discount Program. Therefore, the inclusion of discounts for internal classroom connections should not be eliminated, nor should the size of the Universal Service Fund be reduced. As I am sure you are aware, this program is essential for preparing our students to enter the workforce of tomorrow.

The E-Rate Telecommunications Discount Program is desperately overdue and our students need these discounts for telecommunications services this year. I urge you and the other FCC Commissioners to fully support the recommendations of the Joint Board and approve the proposed final regulations regarding the Discount Plan for universal service for schools and libraries.

Thank you for your consideration of this matter.

Sincerely,

Patricia Mylott  
Board of Education  
Vacaville Unified School District

EX PARTE OR LATE FILED

MAY 14 1997

The Honorable Reed Hundt, Chairman  
Federal Communications Commission  
1919 M Street, NW, Room 814  
Washington, D.C. 20554

Dear Commissioner Hundt:

RE: CC Docket No. 96-45

I am writing to you in regard to the federal "E-Rate" Telecommunications Discount Program. I am a locally elected school board member from Sierra Sands Unified School District, and I would like to express my strong support for this program and the proposed regulations governing its implementation.

The Telecommunications Act of 1996 and the Federal-State Joint Board discount plan will guarantee that even the poorest schools will have access to the Internet and the ability to provide distance-learning opportunities. The \$2.25 billion a year will address the needs of schools across the country, and more importantly, the plan will bring telecommunications services directly to the classrooms where they can have the greatest impact on students. It is important to remember that each element of this plan is vital to the overall success of the discount program. Therefore, the inclusion of discounts for internal classroom connections should not be eliminated, nor should the size of the Universal Service Fund be reduced. As I am sure you are aware, this program is essential for preparing our students to enter the work force of tomorrow.

The E-Rate Telecommunications Discount Program is desperately overdue, and our students need these discounts for telecommunications services this year. I urge you and the other FCC commissioners to fully support the recommendations of the Joint Board and approve the proposed final regulations regarding the discount plan for universal service for schools and libraries.

Thank you for your consideration of this matter.

Sincerely,

Michael Scott  
Board of Education

RE: CCDocket No.96-45

Dear Chairman Hundt:

I am a school board member from Clarence Central School District in Western New York and President of the Clarence Public Library Board of Trustees, and would like to thank you for your dedication in ensuring that all schools will have affordable access to the Information SuperHighway.

The Telecommunications Act and the Federal- State Joint Board discount plan will guarantee that even the poorest schools will have the opportunity to connect to the Internet and provide distance-learning opportunities. The \$2.25 billion a year will address the needs of all of our schools, and importantly, the plan will bring services directly to the classroom where students learn. Your inclusion of internal classroom connection for discounts is vital. This plan is essential for preparing the workforce of tomorrow.

Presently Suburban Clarence has a Distance- Learning classroom that shares teachers and curriculum with both Urban and Inner City classrooms in subjects such as Astronomy, Music Composition, and Wilderness Wise. (A course designed to have students work as teams and become self-reliant and team oriented in the outdoors after classroom training). Another opportunity Distance Learning has provided is our Adult Community Education program with Distance Learning German I and II, and as well as providing a source for Regional Volunteer Firemen Training Sessions.

**With plans in progress for a new Public Library and the construction in progress for a new Media Center at our High School, a Community Technology Committee was established to determine how the Town, the Library and the School can best be served in the 21st Century with Technology. Hopefully the Telecommunications Act funds will provide a resource for facilitating this collaboration.**

We feel we have a unique opportunity to serve all of the stakeholders in our community.

Our students and community need the deep discounts the Joint Board's discount plan will provide for universal service for schools and libraries.

Thank you,

Sincerely yours,

Jane W. Sweet

RE: CC Docket No. 96-45

Federal Communications Commission  
Office of Secretary

Dear Commissioner Hundt:

I am the Coordinator of Data Processing for the Big Beaver Falls Area School District, Beaver Falls, Pennsylvania and I thank you for your efforts and dedication to ensuring that all schools and libraries will have affordable access to the Information Superhighway.

The Telecommunications Act and Federal-State Joint Board discount plan will provide schools with the best opportunity to maximize their shrinking budgets while actively pursuing the requirements set forth by President Clinton to have all schools across the nation connected to one another via the Information Superhighway. Since funding sources are becoming smaller and grant opportunities remain competitive and difficult to earn, these initiatives through your efforts will allow school districts and libraries to respond to this directive without adversely impacting their ability to respond to the other needs of their students and communities.

The wealth of information and resources available through the Internet provides students, teachers, and administrators valuable tools but the cost of building the infrastructure to access this information is overwhelming. It is rare that after acquiring the computers and related technology that the necessary reserves are available to establish connections to the Internet. The savings through the discounts promised in your initiatives will permit school districts and libraries to provide greater, fairer, and more equitable access to the Internet. We are currently using district funds and state technology initiative funds to build Local Area Networks within our central campus buildings but the costs to link our remote buildings to this central network force us to delay connecting all of the buildings together. Anything that you do to reduce these telecommunications costs will greatly assist in building the infrastructure and connecting everyone together to access the resources that are available on-line.

I urge you to consider the needs of our nation and communities to help us provide the necessary and upgraded skills to our youth to ensure that America thrives in the Twenty-first Century rather than just survives it.

Sincerely,

A handwritten signature in black ink, reading "Gregory M. Polcha". The signature is written in a cursive style with a large, stylized initial "G".

Dear Mr. Hundt,

We are writing in support of discounts on telecommunications services for schools and libraries. Every school needs to have access to the world of information technology. The Telecommunications Act mandates the development of special discount rates for all schools and libraries.

The Federal-State Joint Board on Universal Service sent to the Federal Communication Commission (FCC) set of recommendations for implementing the Universal Service Fund provisions related to schools and libraries.

We urge your support of the Joint Board's recommendations. They will provide affordable discounts for a full range of services, and give schools and libraries flexibility in choosing the services needed to meet each community's needs. These provisions, if adopted by the FCC, will make advanced technology for learning available to all Americans.

Sincerely,  
 Liz Rundstrom  
 Teacher
