405 NPA Jeopardy Meeting Notice

In December of 1996, acting as Industry Central Office Code administrator, I notified the North American Numbering Plan Administrator that the 405 NPA was being placed in NXX Jeopardy. As described in the CO Code Assignment Guidelines, "a jeopardy situation exists when the forecasted and/or actual demand for NXX resources will exceed the known supply during the planning/implementation interval for relief."

In order to ensure fair and equal treatment to all industry participants regarding access to numbering resources during the 405 NPA relief process, a jeopardy plan must be developed by the Industry.

A meeting to discuss the current situation as well as to develop a specific jeopardy plan will be held on February 5, 1997. The meeting will be held at the Embassy Suites Hotel in Oklahoma City, Oklahoma. The meeting will begin at 12:30. I expect the meeting to conclude by 3:00. Please plan to attend this meeting to provide input to the NXX assignment plan that will be used until NPA relief can be planned and implemented in the 405 NPA.

Questions concerning this meeting may be referred to Bill Adair on 913-676-1539 or to Mitch Taylor at 314-247-6530.

Central Office Code Administrator

405 NPA JEOPARDY PLAN

1. All code requests between January 15, 1997, and March 17, 1997, will be returned to the code applicant unassigned.
2. The Industry 405 Jeopardy Plan begins on March 17, 1997.
3. All code applications will be handled on a first-come/first-served basis.
4. All applications will be date and time stamped. For the purposes of this plan, a day begins at 8:00 am Central Time.
5. All code applicants should continue their existing procedures for transmitting code requests to the Code Administrator. However, for the purposes of the 405 Jeopardy Plan, a copy of the code request should be faxed directly to the Code Administrator in all cases. The fax number is 314-247-3100.
6. No expedited activations will be allowed during the 405 Jeopardy Plan.
7. Any request for a code received after 12-26-97 will be assigned from the NPAs as they will be configured after relief has been completed.
8. No code reservations will be allowed during the 405 Jeopardy Plan.
9. Ten NXXs per month may be assigned by the Code Administrator. The total codes assigned in a month will be at least ten per month. The total per month could increase if additional codes are retrieved or if the full allocation of ten codes in a previous month are not assigned.
10. NXXs will be assigned initially on a one per applicant basis, regardless of the number of requests received from that applicant. If ten applicants submit requests for codes in a month, each applicant will be assigned one code. All additional applications will be denied for that month.
11. If less than ten NXX applications are received in a month, the balance of the ten code allocation will be transferred to the next month for possible assignment.
12. If less than ten applicants request codes in a month, but the total number of code applications exceed ten codes (an applicant requests multiple codes), the requests will be processed by assigning one code to each applicant in sequential order. Once the last applicant is assigned a code, the assignment process will rotate to the applicants who requested multiple assignments. Each multiple assignment request will be assigned a code in sequence until the allocation for that month is exhausted. Unfilled requests will be returned to the code applicants.
13. Once all codes available in a month have been assigned, all remaining code requests will be canceled and the applications will be returned to the code applicant.
14. If an applicant is one of the first ten applicants to request a code in a month, the code will be assigned immediately. If an applicant requests multiple codes in a month, the additional codes will not be assigned until the end of the month when all applications have been received.
15. Each month, the procedure described above will be used.
16. Code applicants will be required to resubmit code applications on the first Monday of each month (i.e., 04-07-97, 05-05-97, 06-02-97, 07-07-97, 08-04-97, 09-02-97, 10-06-97, 11-03-97, and 12-01-97). No applicants will be "rolled" from one month to the next. It was felt by the Industry group that this process was fairest to all applicants, even those who may not have immediate NXX needs.
17. Any dispute over the implementations of this jeopardy plan will be resolved with the involvement of the Code Administrator, the Industry Team and/or the OCC staff. This plan has been reviewed by the Oklahoma Corporation Commission staff.

**405 NPA JEOPARDY PLANNING
INDUSTRY MEETING MINUTES
FEBRUARY 26, 1997**

The second Industry meeting was held this day to continue discussions on the development of an Industry Jeopardy Plan for the 405 NPA. Attachment 1 is a list of the attendees.

Bill Adair, NPA Relief Coordinator, advised that we now have approximately 120 codes available for assignment during the Jeopardy Plan period. (This figure includes NXXs which will be retrieved from codes currently shown as Reserved, Protected, and Plant Test.) In the event the Oklahoma Corporation Commission decides that the Overlay Option should be used for relief, this amount would be reduced by approximately 20 codes. This is necessary to accommodate the recent FCC Overlay stipulation of allowing "1 code for every telecommunication provider".

After group discussion, the decision was made to pattern our plan after a recently developed Texas plan. Attachment 2 is a copy of the 405 NPA Jeopardy Plan.

In connection with Item 5 of the Plan, it was suggested that you contact the Code Administration group at 314-247-6597 to confirm receipt of your fax.

In connection with Item 11 of the Plan, Mr. Adair stated that the monthly code assignments will be monitored to ensure we do not end up "rolling over" an excessive number of codes.

If you have questions or comments you may contact either the NPA Relief Coordinator or the Code Administrator.

405 NPA JEOPARDY PLAN

1. All code requests between January 15, 1997 and March 17, 1997 will be returned to the code applicant unassigned.
2. The Industry Jeopardy plan begins on March 17, 1997.
3. All code applications will be handled on a first come/first served basis.
4. All applications will be date and time stamped. For the purposes of this plan, a day begins at 8:00 am Central Time.
5. All code applicants should continue their existing procedures for transmitting code requests to the Code Administrator. However, for the purposes of the 405 Jeopardy plan, a copy of the code request should be faxed directly to the Code Administrator in all cases. The fax number is 314-247-3100.
6. No expedite activation's will be allowed during the Jeopardy plan.
7. Any request for a code received after 12-26-97 will be assigned a code from the NPA's as they will be configured after the split has been completed.
8. No code reservations will be allowed during the Jeopardy plan.
9. 10 NXX's per month may be assigned by the Code Administrator. The total codes assigned in a month will be at least 10 per month. The total per month could increase if additional codes are retrieved or if the full allocation of 10 codes in a previous month are not assigned.
10. NXX's will be assigned initially on a 1/applicant basis, regardless of the number of requests received from that applicant. If 10 applicants submit requests for codes in a month, each applicant will be assigned 1 code. All additional applications will be denied for that month.
11. If less than 10 NXX applications are received in a month, the balance of the 10 code allocation will be transferred to the next month for possible assignment.
12. If less than 10 applicants request codes in a month, but the total number of code applications exceed 10 codes, an applicant requests multiple codes, the requests will be processed by assigning one code to each applicant in sequential order. Once the last applicant is assigned a code, the assignment process will rotate to the applicants who requested multiple assignments. Each multiple assignment request will be assigned a code in sequence until the allocation for that month is exhausted. Unfilled requests will be returned to the code applicants.
13. Once all codes available in a month have been assigned, all remaining code requests will be canceled and the applications will be returned to the code applicant.
14. If an applicant is one of the first 10 applicants to request a code in a month, the code will be assigned immediately. If an applicant requests multiple codes in a month, the additional codes will not be assigned until the end of the month when all applications have been received.
15. Each month, the procedure described above will be used.
16. Code applicants will be required to resubmit code applications the 1st Monday of each month (i.e., 04-07-97, 05-05-97, 06-02-97, 07-07-97, 08-04-97, 09-02-97, 10-06-97, 11-03-96, and 12-01-97). No applicants will be "rolled" from one month to the next. If it was felt by the Industry group that this process was fairest to all applicants, even those who may not have immediate NXX needs.
17. Any dispute over the implementations of this jeopardy plan will be resolved with the involvement of the Code Administrator, the Industry Team and/or the APSC staff. This plan has been reviewed by the Arkansas Public Service Commission staff.

**405 NPA JEOPARDY PLANNING
INDUSTRY MEETING MINUTES
FEBRUARY 5, 1997**

The first Industry meeting was held this day to discuss the 405 NPA Jeopardy situation. Attachment 1 is a list of the attendees.

Bill Adair, NPA Relief Coordinator, provided a review which is highlighted as follows:

- **How many codes remain?** 91 (A/O 02-05-97)
- **How do we allocate codes?** *That is what we are here for – plan will be developed by the Industry to fairly and equitably assign NXXs to the Industry until relief is obtained in the 405 NPA. Would like to have a plan in place by 03-01-97.*
- **How long before relief?** *Dependent upon final approval of Relief Plan by the Oklahoma Corporation Commission. Anticipate date no later than 04-01-98.*
- **Who will settle disputes?** *Disputes arising from any Plan developed will settled by this Industry group.*
- **Additional points made:**
 - ⇒ *A standard part of the jeopardy process, as described in the CO Code Assignment Guidelines, is the elimination of all expedited code activation's. Therefore, ALL code requests throughout the Jeopardy period will be the Industry standard 66-day interval.*
 - ⇒ *The CO Code Assignment Guidelines also call for the elimination of Code Reservations throughout the Jeopardy period.*
 - ⇒ *The plan should try to accommodate as many code requests as possible.*
 - ⇒ *The plan should not discriminate against any segment of the Industry*
 - ⇒ *The main objective is to make sure we have NXXs available for assignment until relief is obtained.*

Mr. Adair stressed the fact that no codes will be assigned until we have an Industry approved Jeopardy Plan.

There was a group discussion on Jeopardy Plans developed in various other areas. Attachment 2 is a copy of the recently approved Plan for the 817 NPA.

The group discussion also included comments concerning issues which may increase code requirements of wireless providers (e.g., recent changes in FCC licensing for PCS providers). Code sharing was again re-visited. Attachment 3 is a copy of an ICCF Draft Report (Rating & Routing in a Competitive Environment) which addresses the issue of code sharing.

ACTION ITEM FOR NEXT MEETING:

- **Be prepared to provide input towards the development and approval of an Industry Jeopardy Plan.**

Next meeting is scheduled for 12:30pm Wednesday, February 26, 1997, at the Embassy Suites Hotel, 1815 South Meridian, Oklahoma City, OK.

If you have questions or comments you may contact either the NPA Relief Coordinator or the Code Administrator.

817 NPA JEOPARDY PLAN

1. All code requests between November 7, 1996 and January 1, 1997 will be returned to the code applicant unassigned.
2. The Industry Jeopardy plan begins on January 2, 1997.
3. All code applications will be handled on a first come/first served basis.
4. All applications will be date and time stamped. For the purposes of this plan, a day begins at 8:00 am Central Time.
5. All code applicants should continue their existing procedures for transmitting code requests to the Code Administrator. However, for the purposes of the plan, a copy of the code request should be faxed directly to the Code Administrator in all cases. The fax number is 405-291-6769.
6. Any request for a code received after 7-17-97 will be assigned a code from the NPA's as they will be configured after the splits have been completed.
7. No expedite activation's will be allowed during the Jeopardy plan.
8. No code reservations will be allowed during the Jeopardy plan.
9. 9 NXX's per month may be assigned by the Code Administrator. The total codes assigned in a month will be at least 9 per month. The total per month could increase if additional codes are retrieved or if the full allocation of 9 codes in a previous month are not assigned.
10. NXX's will be assigned initially on a 1/applicant basis, regardless of the number of requests received from that applicant. If 9 applicants submit requests for codes in a month, each applicant will be assigned 1 code. All additional applications will be denied for that month.
11. If less than 9 NXX applications are received in a month, the balance of the 9 code allocation will be transferred to the next month for possible assignment.
12. If less than 9 applicants request codes in a month, but the total number of code applications exceed 9 codes, an applicant requests multiple codes, the requests will be processed by assigning one code to each applicant in sequential order. Once the last applicant is assigned a code, the assignment process will rotate to the applicants who requested multiple assignments. Each multiple assignment request will be assigned a code in sequence until the allocation for that month is exhausted. Unfilled requests will be returned to the code applicants.
13. Once all codes available in a month have been assigned, all remaining code requests will be canceled and the applications will be returned to the code applicant.
14. If an applicant is one of the first 9 applicants to request a code in a month, the code will be assigned immediately. If an applicant requests multiple codes in a month, the additional codes will not be assigned until the end of the month when all applications have been received.
15. Each month, the procedure described above will be used.
16. Code applicants will be required to resubmit code applications each month. No applicants will be "rolled" from one month to the next. If it was felt by the Industry group that this process was fairest to all applicants, even those who may not have immediate NXX needs.
17. Any dispute over the implementations of this jeopardy plan will be resolved with the involvement of the Code Administrator, the Industry Team and/or the TPUC staff. This plan has been reviewed by the Texas Public Utility Commission staff.

DRAFT 11/12/96

ICCF REPORT ON RATING AND ROUTING IN A COMPETITIVE LOCAL ENVIRONMENT

1.0 INTRODUCTION

This report examines the alternatives which could be considered in place of the assignment of a Central Office (CO) code per carrier, per rate center. The alternatives are described in detail and are evaluated based upon assessment criteria which include the impacts on call rating, call routing, industry documentation, and number assignment. This document has been prepared by the Industry Carriers Compatibility Forum (ICCF), under the aegis of the Carrier Liaison Committee (CLC) of the Alliance for Telecommunications Industry Solutions (ATIS).

Within the ICCF, work on this issue was undertaken in the Rating and Routing Workshop. The Workshop's mission and scope are given below.

MISSION

The Rating and Routing Workshop will attempt to develop the technical capabilities to enable call rating methods and procedures useable in a competitive local arena to allow rating consistent with today's (rate center) environment, without the need to assign a CO/NXX code for each provider, for each rate center.

The practice of assigning a CO/NXX code per provider, per rate center, although allowable under the current CO/NXX Assignment Guidelines, and consistent with regulatory need in some areas, can – in a competitive marketplace – create the need for large numbers of code assignments and subsequent, premature NPA exhaust. The alternative rating methods, to be developed by this Workshop could mitigate the need for multiple code assignments and prevent the potential exhaust of numbering resources.

SCOPE

The Workshop efforts will include the assessment of current technical capabilities associated with call routing and rating methods and the development of possible changes to those methods. To the extent that changes in rating and routing methods are suggested, the related impact on current industry documentation such as the CO/NXX Assignment Guidelines and the Local

DRAFT 11/12/96

Exchange Routing Guide (LERG) will be identified. Liaisons with OBF, NOF, and DIG will take place, when appropriate to jointly work portions of the issue.

2.0 BACKGROUND

Rating and routing arrangements are well defined. These arrangements, developed in an environment where there existed a single local exchange provider within a given geographic area, utilize the first three or six digits of the calling and called party numbers to identify the network address necessary for call routing and the associated rate centers required for call rating. The impending competitive local marketplace and the associated existence of multiple local service providers potentially impacts rating and routing arrangements within the local exchange.

Specifically, if it is desirable to maintain current rating arrangements – that is, the use of current rate center boundaries and the existing call rating methodology -- it appears necessary to assign a minimum of one central office code, per carrier, per rate center. Indeed, the existing Central Office Code Assignment Guidelines allow assignments explicitly to support call rating. Such assignments, however, - where there exist many service providers¹ – place significant demands on the central office code resource, potentially accelerating CO/NXX code exhaust, and possibly advancing the need for NPA relief. This increase in the demand for CO/NXX codes exacerbates the already strong need for this resource caused by the growth of wireless services, use of fax machines, requests for second lines, etc.

3.0 ASSUMPTIONS

The following assumptions were made in the development and evaluation of the alternatives considered in this document.

- All alternatives submitted to the Workshop will be investigated, regardless of timeframe; that is, whether the alternative is implementable in the near term or long term.
- The current rating paradigm, in which call rating is based upon the rate centers associated with the calling and called party, will be maintained.
- The need of all service providers to have access to numbering resources to provide service to new customers is recognized.

¹ Service providers requesting CO code (NXX)s must meet the assignment criteria established by the CO code (NXX) (NXX) Assignment Guidelines INC95-0407-008.
