

not copy, store, maintain, or create any table or database of any kind that is based upon a response to a query to SWBT's Toll Free Calling Database. If AT&T acts on behalf of other carriers to access SWBT's Toll Free Calling Database, AT&T will contractually prohibit such carriers from copying, storing, maintaining, or creating any table or database of any kind from any response provided by SWBT after a query to SWBT's Toll Free Calling Database.

- 9.6.10 AT&T will ensure that it has sufficient link capacity and related facilities to handle its signaling and toll free traffic without adversely affecting other network subscribers and that the SSP Provider has transmitted the appropriate subsystem number and translation type.
- 9.6.11 SWBT provides access to the Toll Free Calling Database (TFCDB) as set forth in this Attachment only as such service is used for AT&T's LSP activities on behalf of its Arkansas local service customers where SWBT is the incumbent local exchange carrier. AT&T agrees that any other use of SWBT's TFCDB for the provision of 800 database service by AT&T will be pursuant to the terms, conditions, rates, and charges of SWBT's effective tariffs, as revised, for 800 database services.

9.7 **AIN Call Related Database**

- 9.7.1 Definition: The AIN is a Network Architecture that uses distributed intelligence in centralized databases to control call processing and manage network information, rather than performing those functions at every switch.
- 9.7.2 SWBT will provide AT&T access to the SWBT's Service Creation Environment (SCE) to design, create, test and deploy AIN-based features, equivalent to the access it provides to itself, providing that security arrangements can be made. AT&T requests to use the SWBT SCE will be subject to request and review procedures to be agreed upon by the Parties.
- 9.7.3 When AT&T utilizes SWBT's Local Switching network element and requests SWBT to provision such network element with a technically feasible AIN trigger, SWBT will provide access to the appropriate AIN Call Related Database for the purpose of invoking either an SWBT AIN feature or an AT&T developed AIN feature as per previous section.
- 9.7.4 When AT&T utilizes its own local switch, SWBT will provide access to the appropriate AIN Call Related Database for the purpose of invoking

either an SWBT AIN feature or an AT&T developed AIN feature as per previous section.

9.7.5 SWBT will provide access to AIN Call Related databases in a nondiscriminatory and competitively neutral manner. Any mediation, static or dynamic, will only provide network reliability, protection, security and network management functions consistent with the access service provided, applied equally and on a competitively neutral basis to all database users including SWBT. Any network management controls found necessary to protect the AIN SCP from an overload condition will be applied based on non-discriminatory guidelines and procedures either (1) resident in the SWBT STP that serves the appropriate AIN SCP or (2) via manual controls that are initiated from SWBT Network Elements. Such management controls will be applied to the specific problem source, where ever that source is, including SWBT, and not to all services unless a problem source cannot be identified.

9.7.6 As requested by AT&T, SWBT will provide specifications and information reasonably necessary for AT&T to utilize SWBT SCE as provided above.

9.7.7 SWBT SCP will partition and take reasonable steps to protect AT&T service logic and data from unauthorized access, execution or other types of compromise, where technically feasible.

9.7.8 When AT&T purchases AIN services, charges will be determined on an individual case basis (ICB) as reflected on the Appendix Pricing UNE - Schedule of Prices or as the Parties may otherwise agree.

9.8 **Access to Directory Assistance Database**

9.8.1 SWBT will provide nondiscriminatory access to SWBT's Directory Assistance listing information which includes published listings, non listed listings as well as listed names, address, zip code and telephone numbers with the exception of nonpublished telephone numbers. Nonpublished Directory Assistance listing information will display the customer name and address only along with an indicator that the number is non published. Access to SWBT Directory Assistance listing information is for the sole purpose of providing voice Directory Assistance to AT&T's customers. Access to SWBT's Directory Assistance listing information allows the AT&T operator to query SWBT's Directory Assistance database and obtain the identical information that is available to SWBT's Directory Assistance operators.

9.8.1.1

**10.0 Operations Support Systems Functions**

10.1 Definition: Operations Support Systems Functions consist of pre-ordering, ordering, provisioning, maintenance and repair, and billing functions supported by SWBT's databases and information.

**10.2 Requirements**

10.2.1 SWBT will provide AT&T access to its Operations Support Systems Functions through the electronic interfaces provided for in Attachment 7 (Pre-Ordering, Ordering, and Provisioning - UNE), Attachment 8 (Maintenance - UNE), Attachment 9 (Connectivity Billing and Recording - UNE), and Attachment 10 (Customer Usage Data - UNE), on the terms and conditions set forth in those Attachments. SWBT will charge AT&T those prices reflected on Appendix Pricing UNE - Schedule of Prices labeled "Operations Support Systems (OSS)" subject to section 1.3 of Appendix Pricing UNE.

**11.0 Cross-connects**

11.1 The cross connect, when required, is the means by which unbundled elements are connected with other unbundled elements or with collocation.

11.2 SWBT offers a choice of four types of cross connects with each unbundled loop type. SWBT will charge AT&T the appropriate rate as shown on Appendix Pricing UNE - Schedule of Prices labeled "Loop Cross Connects" subject to Section 1.3 of Appendix Pricing UNE, except as provided in Section 11.2.1 and 11.2.2 below. The applicable cross connects are as follows:

1. Cross connect to DCS
2. Cross connect to MUX/Interoffice
3. Cross connect to Collocation
4. Cross connect to Switch Port

11.2.1 The Parties agree that there will be no charge for the cross connect between an unbundled loop and the digital cross-connect system and/or switch port, as shown on Appendix Pricing UNE - Schedule of Prices and labeled "Analog Loop to DCS/Switch Port" and "Digital Loop to DCS/Switch Port."

11.2.2 When AT&T orders a cross connect between a 4-Wire PRI digital loop and inter office transport, AT&T will pay the rates and charges labeled "Digital Loop to Multiplexer/Interoffice - 4-Wire PRI."

11.3

11.3.1

11.4

11.4.1

11.4.2

12.0 **Additional Requirements Applicable to Unbundled Network Elements**

This Section 12 sets forth additional requirements for unbundled Network Elements which SWBT agrees to offer to AT&T under this Agreement.

12.1 **Requirements**

12.1.1 Within 60 days of the Effective Date of this Agreement, AT&T and SWBT will agree upon a process to resolve technical issues relating to interconnection of AT&T's network to SWBT's network and Network Elements and Ancillary Functions. The agreed upon process will include procedures for escalating disputes and unresolved issues up through higher levels of each company's management. If AT&T and SWBT do not reach agreement on such a process within 60 days, any issues that have not been resolved by the parties with respect to such process will be submitted to the Dispute Resolution procedures set forth in this Agreement unless both parties agree to extend the time to reach agreement on such issues.

12.2 **Protection, Restoration, and Disaster Recovery**

12.2.1 **Synchronization**

12.2.1.1 **Definition:**

Synchronization is the function which keeps all digital equipment in a communications network operating at the same average frequency. With respect to digital transmission, information is coded into discrete pulses. When these pulses are transmitted through a digital communications network, all synchronous Network Elements are traceable to a stable and accurate timing source. Network synchronization is accomplished by timing all synchronous Network Elements in the network to a stratum 1 source so that transmission from these network points have the same average line rate.

12.2.2 **Technical Requirements**

SWBT will provide synchronization to equipment that is owned by SWBT and is used to provide a network element to AT&T in the same manner that SWBT provides synchronization to itself.

12.3 **Cooperative Testing**

12.3.1 Upon request, at Time and Materials charges, SWBT will provide to AT&T cooperative testing to test any network element provided by SWBT and to test the overall functionality of network elements provided by SWBT that are connected to one another or to equipment or facilities provided or leased by AT&T, to the extent SWBT has the ability to perform such tests. The cooperative testing provided for in this paragraph is exclusive of any maintenance service and related testing that SWBT is required to provide for unbundled Network Elements under Attachment 6 or Attachment 8.

13.0 **Dark Fiber**

13.1 "Dark fiber" is fiber transmission media which has been deployed by SWBT but is not being utilized to provide service.

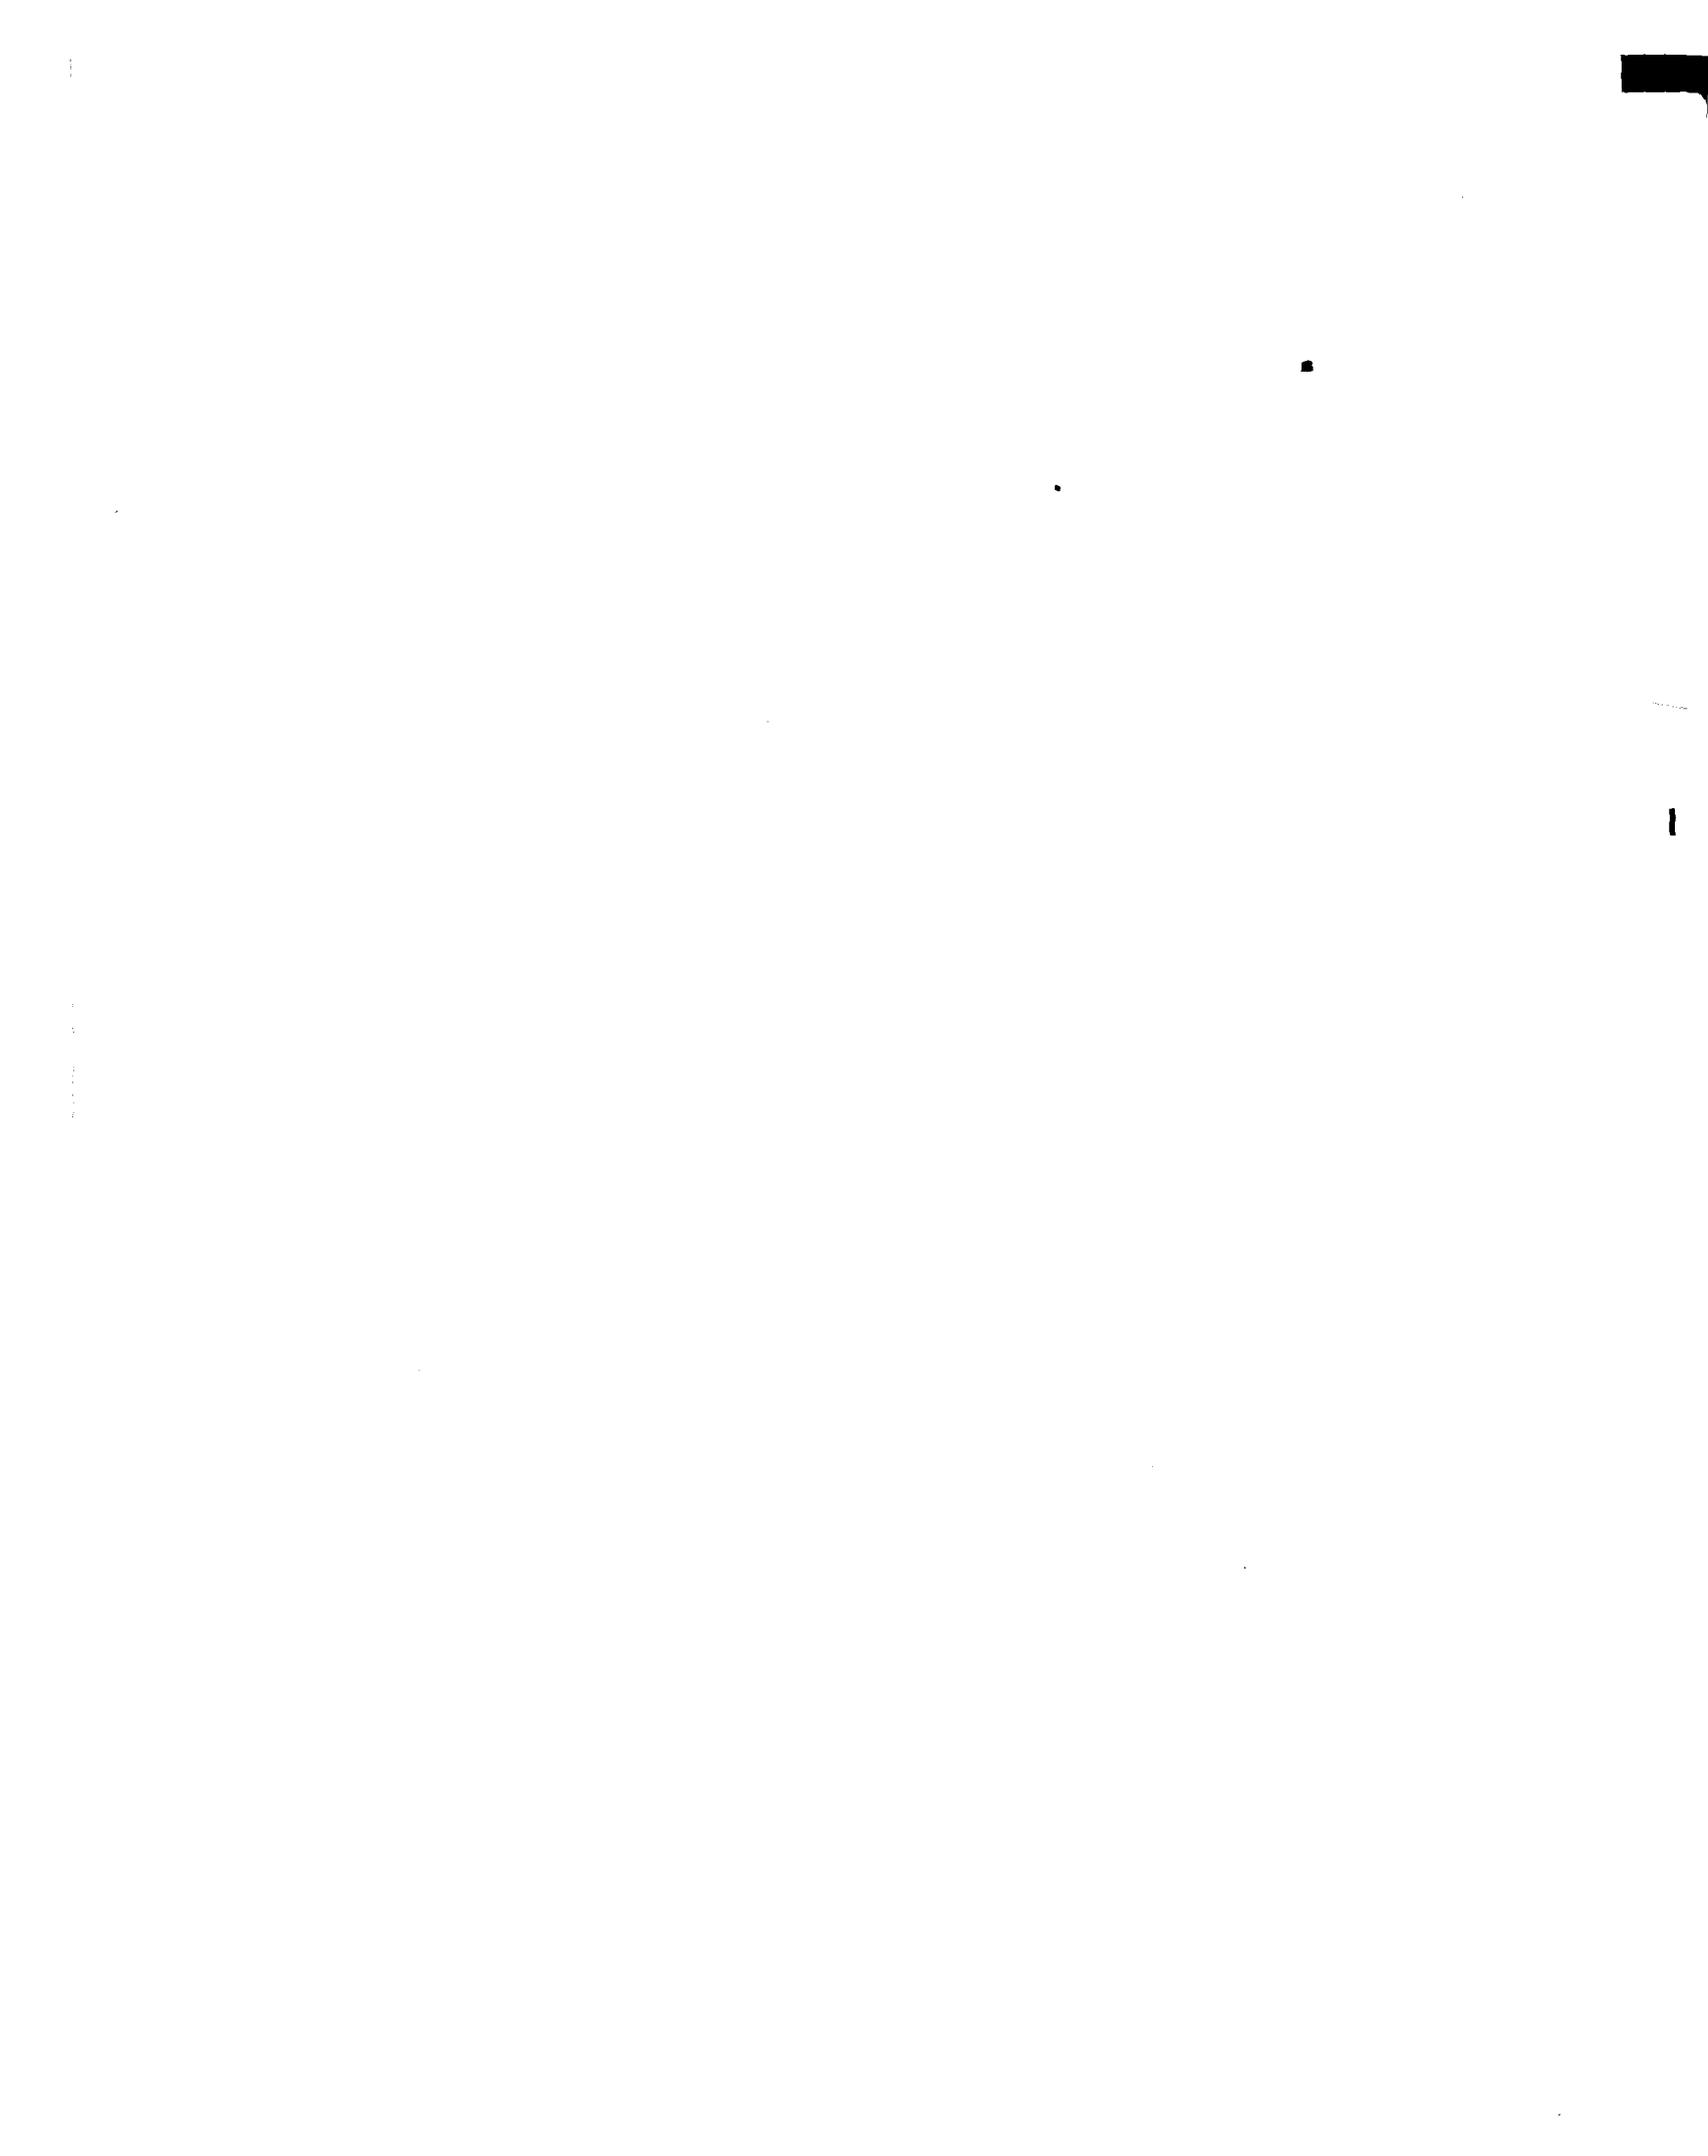

13.2 SWBT will make dark fiber available to AT&T as an unbundled element at any technically feasible point.

13.3 When AT&T purchases dark fiber, it will pay the rates and charges shown on Appendix Pricing UNE-Schedule of Prices and labeled "Dark Fiber," or as agreed to by the Parties, or as may otherwise be ruled by the Arkansas Commission, subject to section 1.3 of Appendix Pricing - UNE.

14.0 **Pricing**

14.1 **Price Schedules**

Attached hereto as Appendix Pricing - UNE is a schedule which reflects the prices at which SWBT agrees to furnish unbundled Network Elements to AT&T.

**APPENDIX PRICING - UNE**

**1.0 Application of Prices**

1.1 AT&T agrees to compensate SWBT for unbundled Network Elements at the rates contained in this Appendix.

1.2 Unless otherwise stated, SWBT will render a monthly bill for Network Elements provided hereunder. Remittance in full will be due within thirty (30) days of receipt of invoice. In accordance with paragraph 8.1 of the General Terms and Conditions, interest will apply on overdue amounts.

1.3 The pricing rates and charges, terms and conditions reflected herein and on Appendix Pricing UNE - Schedule of Prices are subject to modification, consistent with future FCC and Arkansas Commission proceedings.

Each rate or charge on the Schedule of Prices is identified in one of three ways, corresponding to the Parties' agreement or disagreement regarding such rate or charge as follows:

- (1) "Agreed" rates or charges have been negotiated and agreed to by the Parties.
- (2) "Ordered" rates or charges are rates that SWBT has calculated in response to the February 28, 1997, Order of the Arkansas Commission in Docket No. 96-395-U. Subject to verification by the APSC that SWBT's calculation of these rates conforms to the Order, AT&T will pay the "Ordered" rates where it purchases the elements to which those rates apply. If the APSC determines, or the Parties agree, that changes are required to any of the Ordered rates in order to meet the requirements of the February 28, 1997 Order, any billing and payments will be adjusted correspondingly.
- (3) "Additional" rates or charges relate to proposed rate elements that were not expressly identified in the rates ordered by the Arkansas Commission. For additional rates, the first rate shown is the rate that SWBT has proposed for that item. The second rate shown, if any, is the rate that AT&T has proposed. When the second rate shown is "NA," no payment is proposed by AT&T for this rate element.

1.4 Except for requests that are expressly made subject to the Special Request process described in section 2.21 of Attachment 6 ("Special Request Elements"), AT&T may order, and SWBT will provide all Attachment 6 Elements on the basis of the attached Schedule of Prices. The Parties agree that the Appendix Pricing - UNE - Schedule of Prices contains a complete list of rate elements and charges associated with unbundled Network Elements and other items, if any, offered by SWBT pursuant to this Attachment. This paragraph does not limit or expand the use of the Special Request Process.

## 2.0 Recurring Charges

2.1 Recurring Charges, where applicable, for each unbundled Network Element are as shown in Appendix Pricing UNE - Schedule of Prices.

2.2 Where Rates are shown as monthly, a month will be defined as a calendar month. The minimum term for each monthly rated element will be one (1) month. After the initial month, billing will be on the basis of whole or fractional months used..

2.3 Where rates are based on miles, the mileage will be calculated on the airline distance involved between the locations. To determine the rate to be billed, SWBT will first compute the mileage using the V&H coordinates method, as set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No 4. When the calculation results in a fraction of a mile, SWBT will round up to the next whole mile before determining the mileage and applying rates.

2.4 Where rates will be based on minutes of use, usage will be accumulated at the end office or other measurement point without any per call rounding and total minutes by end office are rounded to the next higher minute per monthly billing cycle. In the long term usage will be measured beginning when the facilities are seized (excluding network failures) and ending when the facilities are released. SWBT is currently unable to measure busy/don't answer (by/da), but SWBT intends to develop such capability. SWBT will provide AT&T not less than 30 days notice when SWBT begins to measure by/da. No related true up will occur.

## 3.0 Certain Combinations

3.1 The Parties acknowledge that AT&T may convert a SWBT end-user customer or an AT&T (or other LSP) resale customer to service provided by AT&T through unbundled Network Elements. In those situations when AT&T orders all the SWBT Network Elements required to provide service to that customer without any change in features or functionality from the service that was being provided at the time of the order, there will be no unnecessary interruption of service to the end-user customer. For orders covered by this section a Provider Change Charge

of \$12.00 (pursuant to section I, paragraph 7 of the Arbitrator's Order dated February 28, 1997.

3.2

3.3

3.4

3.5

SWBT proposes the following order types subject to section 1.3 of this Attachment.

**Change:** This will apply when an AT&T customer's existing service is being physically altered in some way.

**Record:** This will apply when there is no physical or logical work required and all that is necessary is the update of SWBT's internal records.

**Disconnect:** This will apply when an existing service is being completely disconnected.

**Suspend:** This will apply when a functionality is to be suspended until further notice

**Restore:** This will apply when a previously suspended functionality is to be restored

**Expedited:** This will apply when the requested due date is less than the standard interval.

4.0

**Maintenance of Service, Time and Materials, and Non Productive Dispatch Charges**

4.1

If AT&T requests or approves a SWBT technician to perform special installation, maintenance, or conversion services for Unbundled Network Elements excluding services which SWBT is required to provide under Attachment 6, Attachment 8, or otherwise under this Agreement, AT&T will pay Maintenance of Service and/or Time and Material Charges for such services as are reasonably required, including requests for installation or conversion outside of normally scheduled working hours.

- 4.2 Consistent with Attachment 8: Maintenance UNE, if AT&T determines that a trouble has occurred in SWBT's equipment and/or facilities, AT&T will issue a trouble report to SWBT.
- 4.3 AT&T will pay Maintenance of Service charges for technicians' time reasonably required when AT&T reports a suspected failure of a network element and SWBT dispatches personnel to the end user's premises or a SWBT central office and trouble was not caused by SWBT's facilities or equipment. Maintenance of Service charges will include all technicians dispatched, including technicians dispatched to other locations for purposes of testing.
- 4.4 AT&T will pay Maintenance of Service charges for technicians' time reasonably required when AT&T reports a suspected failure of a network element and SWBT dispatches personnel and the trouble is in equipment or communications systems provided by an entity other than SWBT or in detariffed CPE provided by SWBT, unless covered under a separate maintenance agreement.
- 4.5 If AT&T issues a trouble report allowing SWBT access to the end user's premises and SWBT personnel are dispatched but denied access to the premises, then Non Productive Dispatch charges for technicians' time reasonably required will apply. Subsequently, if SWBT personnel are allowed access to the premises, the Non Productive Dispatch charges will still apply.
- 4.6 Time and Materials and/or Maintenance of Service and/or Non Productive Dispatch charges apply on a first and additional basis for each half hour or fraction thereof. If more than one technician is dispatched in conjunction with the same trouble report, the total time for all technicians dispatched will be aggregated prior to the distribution of time between the "First Half Hour or Fraction Thereof": and "Each Additional Half Hour or Fraction Thereof" rate categories. Basic Time is considered to be Monday through Friday 8 a.m. to 5 p.m. which is SWBT's normally scheduled work day. SWBT's normally scheduled work week is Monday through Saturday. Overtime applies when work is out of a normally scheduled work day during a normally scheduled work week (i.e., weekday nights and/or Saturdays). Premium time is time worked outside of SWBT's normally scheduled work week and includes Sundays and Holidays. Any time not consecutive with SWBT's normally scheduled work day may be subject to a minimum charge of two hours if dispatch of an off duty SWBT employee is necessary.
- 4.7 SWBT will bill AT&T Time and Materials, Non Productive Dispatch and/or Maintenance of Service Charges only pursuant to AT&T's authorization, including authorizing a dispatch, consistent with procedures outlined in this Agreement.

4.8 If as a result of the proceedings in Case No. TO-97-40, the Parties learn that the costs for Time and Materials, Non Productive Dispatch and Maintenance of Service work are recovered in the recurring and/or nonrecurring charges for unbundled Network Elements, no further charges for Time and Materials, Non Productive Dispatch and Maintenance of Service will be made for those elements where such costs are already recovered, and SWBT will refund charges previously paid.

4.9 SWBT will manage costs of Time and Materials, Non Productive Dispatch and Maintenance of Service Charges activities charged to AT&T in a manner that is consistent with SWBT's internal management of those costs.

4.10 Charges for services contained in this section are listed in Appendix Pricing UNE - Schedule of Prices labeled "Maintenance of Service Charges", "Time and Materials Charges", and "Non Productive Dispatch Charges".

5.0 **Application of Usage Sensitive Charges To Particular Call Flows**

5.1

5.1.1 Unbundled Local Switching (ULS) may include two usage sensitive components: originating usage (ULS-O) and terminating usage (ULS-T). ULS-O represents the use of the unbundled Local Switching element to originate local calls. ULS-T represents the use of the unbundled Local Switching element to terminate local calls.

5.2 **Standard Interim Rate Structure for ULS**

As of the Effective Date of this Agreement, SWBT is unable to measure terminating usage associated with unbundled Local Switching and in certain circumstances originating usage associated with unbundled Local Switching. Once SWBT has the ability to measure such usage, the standard interim rate structure for ULS described in this section will become effective. SWBT will provide AT&T 30 days written notice prior to implementing the Standard Interim Rate Structure for ULS.

5.2.1 **Intra Switch Calls** - (calls originating and terminating in the same switch i.e., the same 11 digit Common Language Location Identifier (CLLI) end office):

5.2.1.1 AT&T will pay ULS-O and SS7 signaling for a call originating from an AT&T ULS line or trunk port that terminates to a SWBT end user service line, Resale

service line, or any unbundled line or trunk port which is connected to the same end office switch.

5.2.1.2 AT&T will pay ULS-O and SS7 signaling charges for a centrex-like ULS intercom call in which AT&T's user dials from one centrex-like station to another centrex-like station in the same common block defined system.

5.2.1.3 SWBT will not bill ULS-T for Intra switch calls.

5.2.2 Inter-switch Calls - (calls not originating and terminating in the same switch) i.e., not the same 11 digit Common Language Location Identifier (CLLI) end office:

5.2.2.1 Local Calls

5.2.2.1.1 General Principles

5.2.2.1.1.1 When a call originates from an AT&T ULS Port, AT&T will pay ULS-O and SS7 signaling charges. If the call routes over SWBT's common network, AT&T will pay charges for Common Transport as reflected in Appendix Pricing UNE - Schedule of Prices. AT&T will also pay Tandem Switching charges where applicable as reflected in Appendix Pricing UNE - Schedule of Prices.

5.2.2.1.1.2 When a call terminates to an AT&T ULS Port, AT&T will pay ULS-T charges.

5.2.2.1.2 Illustrative Call Flows

The following call flows provide examples of application of usage sensitive UNE charges and compensation as set out in Attachment 12: Compensation.

5.2.2.1.2.1 AT&T (UNE) Originating and SWBT Terminating:

AT&T Pays:

- ULS - O
- Applicable Common Transport and Tandem Switching
- SS7 Signaling
- Applicable End Office Switching (aka Terminating Compensation)

5.2.2.1.2.2 SWBT Originating and AT&T (UNE) Terminating

AT&T Pays:

- ULS - T

SWBT pays:

- Applicable End Office Switching (aka Terminating Compensation)

5.2.2.1.2.3 AT&T (UNE) Originating and CLEC (UNE) Terminating

AT&T Pays:

- ULS - O
  - Applicable Common Transport and Tandem Switching
  - SS7 Signaling
- 5.2.2.1.2.4 AT&T (UNE) Originating and AT&T (UNE) Terminating  
AT&T Pays:
- ULS - O
  - Applicable Common Transport and Tandem Switching
  - SS7 Signaling
  - ULS - T
- 5.2.2.1.2.5 CLEC (UNE) Originating and AT&T (UNE) Terminating  
AT&T Pays:
- ULS - T
- 5.2.2.1.2.6 CLEC (Resale services) Originating and AT&T (UNE) Terminating  
AT&T Pays:
- ULS - T
- 5.2.2.1.2.7 AT&T (UNE) Originating and CLEC (Resale services) Terminating  
AT&T Pays:
- ULS - O
  - Applicable Common Transport and Tandem Switching
  - SS7 Signaling
- 5.2.2.1.2.8 AT&T (UNE) Originating to CLEC (Facilities Based Network (FBN))  
Terminating  
AT&T Pays:
- ULS - O
  - Applicable Common Transport and Tandem Switching
  - SS7 Signaling
- 5.2.2.1.2.9 CLEC (FBN) Originating to AT&T (UNE) Terminating  
AT&T Pays:
- ULS - T
- 5.2.2.2 IntraLATA and InterLATA Toll Calls
- 5.2.2.2.1 General Principles
- 5.2.2.2.1.1
- 5.2.2.2.1.1

5.2.2.2.1.2 After the implementation of IntraLATA Dialing Parity, IntraLATA toll calls from AT&T ULS Ports will be routed to the end user IntraLATA Primary Interexchange Carrier (PIC) choice. When an interLATA toll call is initiated from an ULS port it will be routed to the end user interLATA PIC choice.

5.2.2.2.1.2.1

5.2.2.2.1.2.2

5.2.2.2.1.3 When an IntraLATA or InterLATA toll call terminates to an AT&T ULS Port, AT&T will pay ULS-T charges .

5.2.2.2.2 Illustrative IntraLATA (Post IntraLATA Dialing Parity) and InterLATA Call Flows

The paragraphs below illustrate Post IntraLATA Dialing Parity applications and InterLATA applications. They provide examples of application of usage sensitive UNE charges.

5.2.2.2.2.1 AT&T (UNE) Terminating  
AT&T pays:  
· ULS - T

5.2.2.2.2.2 AT&T (UNE) Originating  
AT&T pays:  
· ULS - O  
· SS7 Signaling

5.2.2.3 Toll Free Calls

5.3 Temporary ULS Rate Structure

5.3.1 As of the Effective Date of this Agreement, SWBT is unable to measure terminating usage associated with unbundled Local Switching and in certain circumstances originating usage associated with unbundled Local Switching. Once SWBT has the ability to measure such usage, the standard interim rate structure for ULS described above will become effective. During the time period prior to the implementation of the Standard Interim Rate Structure the following temporary ULS Rate structure will apply.

- 5.3.2 Intraswitch calls will be handled as described above in the Standard Interim Rate Structure.
- 5.3.3 For completed local calls originating from an AT&T ULS Port which terminate in an end office with an 11 digit CLLI different from the originating end office CLLI, AT&T will pay, in lieu of ULS - O, ULS - T, unbundled Common Transport, and unbundled Tandem Switching rates, a charge comprised of the following: two times ULS plus one Common Transport rate plus .3 times Tandem Switching Rate. The application of this formula appears in the Appendix Pricing UNE - Schedule of Prices labeled "Local Switching - Temporary - Between Different Central Offices per Originating MOU.
- 5.3.4 No applicable end office switching (aka terminating compensation) will be charged for terminating the calls described in 5.3.3. While the temporary ULS rate structure is in effect, AT&T will only be charged for calls described in 5.3.3 which are completed. While the temporary ULS rate structure is in effect, AT&T will not be charged ULS - T on any calls.
- 5.3.5
- 5.3.6 If, when AT&T originates a call to a facilities based LSP under the Temporary Interim Structure, the LSP will bill SWBT for terminating compensation.
- 6.0 The following defines the zones found in the Appendix Pricing UNE - Schedule of Prices:

|        | Total Access Lines  |
|--------|---------------------|
| Zone 1 | Greater than 72,000 |
| Zone 2 | 3,001 - 72,000      |
| Zone 3 | 3,000 or fewer      |

SOUTHWESTERN BELL TELEPHONE COMPANY

**ATTACHMENT 7: ORDERING AND PROVISIONING**  
**UNBUNDLED NETWORK ELEMENTS**

**1.0 General Requirements**

- 1.1 SWBT will provide pre-order, ordering and provisioning services to AT&T associated with unbundled Network Elements ("UNEs"), pursuant to the requirements set forth in this Attachment 7: Ordering and Provisioning - Unbundled Network Elements.
- 1.2 AT&T may order, and SWBT will fill orders, for unbundled Network Elements as defined in Attachment 6. Multiple individual Elements may be requested by AT&T from SWBT on a single Local Service Request (LSR) for a specific customer, without the need to have AT&T send an LSR for each Element. AT&T must specify when placing an order, in what order the unbundled Network components are to be connected, consistent with the industry standards referenced in paragraph 3.3 of this Attachment. SWBT will make available to AT&T the information reasonably required for such specifications. The Parties will cooperate to implement this section until industry standards are developed.
- 1.3 For all unbundled Network Elements and Combinations ordered under this Agreement, SWBT will provide pre-order, ordering and provisioning services equal in quality and speed (speed to be measured from the time SWBT receives the service order from AT&T) to the services SWBT provides to its end users.
- 1.4 SWBT and AT&T agree to work together in the Order and Billing Forum (OBF) and the Telecommunications Industry Forum (TCIF) to establish and conform to uniform industry standards for electronic interfaces for pre-order, ordering and provisioning. Neither Party waives any of its rights as participants in such forums in the implementation of the standards.
- 1.5 In ordering and provisioning unbundled Network Elements and Combinations, AT&T and SWBT will utilize mutually agreeable standard industry order formats and data elements developed by the OBF and TCIF EDI. Network Elements will be ordered as either Common Use or Customer Specific as follows:
- 1.5.1 Common Use unbundled Network Elements are defined as unbundled Network Elements provided by SWBT that are used by AT&T to provide a Telecommunications Service but are not customer specific, including, without limitation, Common Transport, Dedicated Transport, tandem switching, signaling and call-related databases, Operator Services and DA, and Operations Support Systems. Common-Use Unbundled Network Elements will be ordered in a manner that is consistent with the OBF Access Service Request Process; in addition customized routing will be ordered in the same manner. When AT&T orders
