Message: Please break Pac-Bell's monopoly on local phone service! I just experienced a week long outage that I believe would have only been a day or two had there been competition. Not only was I severely inconvenienced, but I received very calous and rude treatment from the several Pac-Bell employees that I pleaded with to reduce the outage period. I know they would not have treated me that way if they knew I could just cancel my service and turn to a competitor. We're all victims of the whims of an unfriendly giant! The situation will only get worse without true competition!

Subject: A letter from a Californian for Telecommunications Choice.

Dear Federal Communications Commission,
I am writing today to ask you to support the Californians for Telecommunications Choice. I have been trying for several months to receive local telephone service from a company other than Pacific Bell, but have been unable because of Pacific Bell. I believe that SBC/Pac Bell should be denied access to the long distance market until it allows other companies fair and equal competition in local telephone access.

Sincerely,

Ronald D. Nicolai

Dear Federal Communications Commission Representative:

Please help make sure real local competition exists here in California before you let Pacific Bell into the national long distance service! I had MCI's service for a little while here: they gave me much better CA long distance rates, a bigger non-toll calling area, and better phone service than PacBell! Unfortunately they have been squeezed out by PacBell's practices and are no longer accepting new service (including when a move requires a phone number change, as in my case.)
