Re: LMCC Petition for Rulemaking (RM-9267)

Dear Ms. Salas:

I strongly support LMCC Petition for Rulemaking (RM-9267). The fast action by the FCC in seeking a public dialogue is commendable.

Our business is engaged in the commercial activity of designing, selling, and installing two way radio systems to industry, institutions, and government entities throughout Florida. We have been in this business for over fifteen years and currently employ 31 people. Our customers depend on private two way radio systems to improve the safety and efficiency of their operation.

A private two-way radio system provides communications in a way that cellular and PCS phone type systems cannot. Our customers have a need for instant, fleet-wide communications. Private systems may be designed in many different configurations allowing us to meet the specific coverage requirements of our customers.

In many instances, we are unable to provide private two-way radio systems to customers who could derive benefit from such a system due to the fact that we are unable to locate a suitable radio frequency. These customers are unable to enjoy the safety and productivity that is possible through the use of a private two-way radio system. Surely, this is not in the public interest.

The FCC should proceed as quickly as possible with this petition. We are experiencing strong economic growth in the Philadelphia Metropolitan Area and the lack of spectrum is a major impediment for both my company and our customers. Thank you for your prompt attention to this matter.

Sincerely,

Dale L Petrovitch - President

Re: LMCC Petition for Rulemaking (RM-9267)

Dear Ms. Salas:

I strongly support LMCC Petition for Rulemaking (RM-9267). The fast action by the FCC in seeking a public dialogue is commendable.

Our business is engaged in the commercial activity of designing, selling, installing, and servicing wireless two-way radio systems to industry, small business, and local government throughout Oklahoma and Southern Kansas.

Our business is privately owned and is only supported by the wireless customers we can sale and service. We have been in business since 1989 and presently employed 18 people. Our customers depend on private two-way radio systems to improve the safety and efficiency of their operations.

A private two-way radio system provides wireless communications in a way that neither cellular or PCS can. Our customers have a need for instant fleet wide communications. Private systems can be designed I many different configurations allowing us to meet the specific coverage requirements of our customers.

In many instances, we are unable to provide private two-way radio systems to customers who could utilize the benefits of such a system due to the fact that we are unable to locate a suitable radio frequency. These customers are unable to enjoy the safety and productivity that is possible through the use of this type radio system. Surely this is not in the public interest.

The FCC should proceed as quickly as possible with this petition. We are experiencing strong economic growth in Oklahoma and Kansas and the lack of radio spectrum is a major impediment for both my company and our customers.

Thank you for your prompt attention to this matter.

Sincerely,
RADIO UNLIMITED, INC.
