Secretary of the FCC  
Federal Communications Commission  
Washington, DC 20554

Dear Secretary,

In reference to RM-9267:

I ask that you consider NOT taking the 420 - 430 MHz and the 444 - 450 MHz frequencies away from Radio Amateurs.

There are many 70cm band repeaters in this area that are available for emergency communications. The local fire agencies and Emergency Services Division of Riverside County know of our ability and usefulness during fires and disasters. Taking away the tools we need to help in emergencies is a serious matter to all of us.

Sincerely;

Aileen Baker, KD6KUK  
R.A.C.E.S. Operator
