Subject: LMCC Petition (RM-9267)

Dear Ms. Salas:

I would like to express my strong support for the efforts of the Land Mobile Communications Council to acquire more spectrum for private land mobile systems. Our radio communication system is an invaluable business tool that increases the productivity of our organization and provides additional safety protection for our employees.

Based on the benefits that our company receives, private radio is clearly a major asset to this country. Clearly, reducing our ability to choose a private wireless communications solution will disrupt our business plans and not serve the long term interests of the United States.

Thank you for considering this letter.

Sincerely,

A handwritten signature in cursive script that reads "Bruce A. Colt" with a small "1998" written at the end.

Re: LMCC Petition for Rulemaking (RM-9267)

Dear Ms. Salas:

I strongly support LMCC Petition for Rulemaking (RM-9267). The fast action by the FCC in seeking a public dialogue is commendable.

Our business is engaged in the commercial activity of designing, selling, and installing two-way radio systems to industry, institutions, agriculture, and government entities throughout Nebraska and Wyoming. We have been in this business for forty-four years and currently employ ten people. Our customers depend on private two-way radio systems to improve the safety and efficiency of their operation.

A private two-way radio system provides communications in a way that cellular and PCS phone type systems cannot. Our customers have a need for instant, fleet-wide communications. Private systems may be designed in many different configurations allowing up to meet the specific coverage requirements of our customers.

In many instances, we are unable to provide two-way radio systems to customers who could derive benefit from such a system due to the fact that we are unable to locate a suitable radio frequency. These customers are unable to enjoy the safety and productivity that is possible through the use of a private two-way radio system. Surely, this is not in the public interest.

The FCC should proceed as quickly as possible with this petition. We are experiencing expansion of economic growth in our area and the lack of spectrum is a major impediment for both this company and our customers. Thank you for your prompt attention to this matter.

Sincerely,

*Larry Martin

Subject: LMCC Petition (RM-9267)

Dear Ms. Salas

I would like to express my strong support of the Land Mobile Communications Council Petition for Rule Making to acquire more spectrum for private land mobile systems. I would like to thank the Commission for placing this petition on public notice so quickly and allowing this industry an opportunity to comment on this critical issue.

We are a two-way radio dealer providing equipment sales and communications support to 500 private customers in my area. We have been in business for 30 years and currently employ 15 people.

Our customers consider their private radio communication system an invaluable business tool that increases the productivity of their organization and provides additional safety protection to their employees. Through the years, we have found it increasingly difficult to provide our customers adequate communication systems due to the shortage of uncongested frequencies in our area. These customers are unable to enjoy the safety and productivity that is possible through the use of a private two-way radio system. In many cases, these private users rely on instant, fleet wide communications within unique coverage areas that are not conducive to many commercial systems.

Clearly, providing these customers with new spectrum and the ability to choose a private wireless communications solution that will best fit their unique needs will benefit not only these private users, but the economy as a whole.

I urge the Commission to consider the unique needs of the private wireless industry and to allow them the flexibility of choosing their communications solution. Thank you for your consideration on this very critical issue

Sincerely,

Bonnie Holbrook
