Enhancement Review Meeting Notice & Agenda

When: Monday, July 13, 1998, 09:00 a.m. till 01:00 p.m.

Where: BellSouth Center, 675 West Peachtree St. N.E., Vail Auditorium, Atlanta, GA

Contact: Beverly A. Cochran, BellSouth Change Control Manager
404 927-7806

- | | |
|--|---------------|
| Continental Breakfast & Sign-in | 08:30 – 09:00 |
| Opening
<i>Facilitator/BellSouth opens meeting.</i> | 09:00 – 09:10 |
| Change Request Log Status
<i>Change Requests to be reviewed will have a status of "P" for Pending and will follow the process flow as outlined in Part 2 – Detailed Process Flow.</i> | 09:10 – 09:40 |
| Regulatory Issues
<i>Review any issues that could impact Change Request(s) prioritization. This may include FCC rulings, PSC rulings or Industry Changes.</i> | 09:40 – 09:50 |
| Release Management & Implementation Status
<i>Review status of scheduled Releases.</i> | 09:50 – 10:00 |
| Recycled Change Request(s)
<i>Determine priority disposition of Change Request(s) that are on the Candidate Request List, but have not been scheduled for a target release.</i> | N/A |
| BREAK | 10:00 – 10:15 |
| Initial Prioritization of Change Requests
<i>This will be a handout of the consolidated Preliminary Priority List compiled by the BCCM. This list represents each participating company's internal prioritization of the Change Requests. Company Preliminary Priority Lists must be completed and submitted to the BCCM one week prior to the Enhancement Review Meeting to be included in the Consolidated Priority List. The Consolidated Priority List is used as a starting point in determining final Candidate Requests.</i> | 10:15 – 10:25 |
| Presentation of Change Requests
Ordering Four (4) requests were submitted
3 impacting the EDI Interface, Ordering, 1 impacting LENS/LPOG, Pre-Ordering
<i>The presentation of each Change Request is limited to 20 minutes. The initiator of the request is allowed a maximum of five (5) minutes of presentation time followed by a 15 minute question and answer session. Change Requests will be presented and prioritized by Category, by Interface.</i> | 10:25 – 11:45 |
| Develop Candidate Change Request List
Ordering & Pre-Ordering
<i>Participating companies will vote on the final prioritization of the Change Requests as indicated in the Enhancement Review Section of the Change Control Process Document. Change Requests to be submitted for sizing and sequencing will be placed on the Candidate Change Request List along with the "Need by Date".</i> | 11:45 – 11:55 |
| Present Outputs
<i>Re-cap of final prioritization and Change Requests submitted to the Candidate Change Request List.</i> | 11:55 – 12:05 |
-

Enhancement Review Meeting Notice & Agenda

Issues/Action Items

12:05 – 12:20

Re-cap any issues and action items surfaced during the meeting. Each item is assigned an owner and a follow-up date.

Adjourn

12:20 – 12:25

Facilitator/BellSouth reviews next steps.

Description of requested change including purpose and benefit received from this change. (Use additional sheets, if necessary.) (20)

Develop the ability to disconnect both the loop portion and related ILNP/LNP portion of a service

using a single Reqtype B EDI order. This is a change to the existing method that requires the the CLEC to issue individual standalone orders for the loop and ILNP/LNP portions

Known dependencies (21)

MCI does not want to rely on BST to cross-relate orders and PONS.

This appears to be a BellSouth requirement not used by other LECs

Additional Information Yes No (22)

List all business specifications and/or requirements documents included (or Internet / Standards location, if applicable)

Additional Description Line 20

Log # EDI06151021

Clarification Version 1

Rectype B is the EDI requisition type for an unbundled loop with interim number portability or local number portability (INP/LNP). Today, BST supports the use of this rectype when the CLEC migrates an existing BellSouth customer to the CLEC, and reuses the loop facilities as unbundled loops and uses either interim or permanent local number portability. Everything is done using a single order.

If the CLEC needs to disconnect the loop and INP/LNP in the future, BellSouth requires two EDI orders. One rectype A (stand-alone loop) with a line level activity of D (disconnect) to disconnect the loop. In addition, a second order rectype C (stand alone number portability) and a line level activity of D (disconnect) to disconnect the INP/LNP

MCI believes that proper order process is to allow the CLEC to send in a rectype B (loop with number portability) and a line activity of D (disconnect) and that would have BellSouth disconnect both the loop and number portability using a single order.

Current BellSouth Position:

BellSouth allows the use a single rectype b order to break up the bundled retail service into loop and INP/LNP on the original migration. Once broken up, changes to the loop and changes to INP require separate orders. The loop is one record and the TN with INP/LNP is a separate record. Both are billed separately.

Single Mode LENS Description

In response to pre-ordering issues raised in GA PSC Docket 8354-U, BellSouth implemented a change to the LENS inquiry mode known as "View All" and proposes to implement a pre-ordering due date calculation capability in Release 4 of LENS on November 14, 1998. The PSC's order requires the implementation of the pre-ordering due date calculation capability thus establishing its priority, but the order does not preclude CLEC input to the development. The present situation presents an opportunity to implement a single mode LENS design concept that would provide LENS using CLECs with a flexible logical process capability from pre-order through the preparation of a complete LSR. The attached diagram visually depicts the proposed design concept.

SINGLE MODE LENS DESIGN CONCEPT

With Calculated Due Date As a Pre-Ordering Function

Customer Letter / Announcement**SN91081307****Date:** April 10, 1998**To:** Competitive Local Exchange Carriers (CLECs)**Subject:** Local Exchange Navigation System (LENS) Release 2.1 and Directory Delivery Information Screen Update

Release 2.1 of the Local Exchange Navigation System (LENS) will be placed into production April 13, 1998. The following LENS enhancements will be introduced in Release 2.1:

Line Detail Screen: The Listed Field Name is expanding from 70 to 105 characters. LENS users will see an additional 35-character field to accommodate listings that are greater than the two current character fields.

Address Validation Screen: LENS will display, when available, telephone number(s) and status, e.g., working or non-working for a specific address when successfully validated. Additionally, if the address is associated with the requesting CLEC's company code, LENS will display the occupant's name. This information will be displayed on the Address Validation screen in a box following the Valid Address "OK" button.

Provides Credit History in Alabama: For the purpose of this enhancement, "Credit History" is defined as "Treatment History", "Returned Check History" and "Credit Class" information. This feature will provide "Credit History" relative to subscribers in the state of Alabama. Details regarding the displayed messages can be found in Chapter 3 of the LENS User Guide.

In addition, following is an update to the **Directory Delivery Information Screen:**

LENS users should manually input "%" instead of "o/o" when "in care of" information is needed to complete directory delivery information.

For reference, there will be additional documentation provided in a LENS 2.1 Work Aid located on the BellSouth Interconnection Services Web site:
