Re: Ex Parte Submission  
Federal-State Joint Board on Universal Service; CC Docket No. 96-45  
Forward-Looking Mechanism for High Cost Support for Non-Rural LECs; CC  
Docket No. 97-160,

Dear Ms. Salas:

At the request of Commission staff, AT&T Corp. and MCI Telecommunications Corporation provided them with the attached files. The attached database utility compiles, on an automated basis, the end office Host/Remote relationships in the Local Exchange Routing Guide (LERG). These relationships may then be pasted into the Switching/Interoffice Module of HAI 50a Model - obviating any need to enter these relationships on a one-by-one entry basis through the model's user interface. The enclosed database routines assume that the user has licensed access to Table 7 of the LERG. The second file provides detailed directions for the use of the database utility

On Friday, September 11, 1998, Rich Clarke of AT&T met with the staff listed below to review with them the attached directions for its use. Please associate these materials with the record in the above captioned docket.

Respectfully submitted,
