I don't feel that it's right that along with my monthly bill I should be charged this particular fee. If a family member is sick and is at the hospital most times they will have to use a payphone to make personal calls, pages, etc. This in it's self is and emergency, but you guys don't look at it that way. I am a strong supporter of many things that you implement but can you do any with this ruling it has a greater effect on the way we all use telecommunications today.

Let this serve as a statement of my dissatisfaction over the \$0.30 charge per 800# on my pager that I have to incur for people using a pay phone. Why pass the charge on to me? You should mandate the charge be paid at the time the call is made.

I object to the ruling that makes it impossible for me to call important "800-numbers" on many pay-phones. It is apparently related to the Telecom Act's fee to be paid by phone companies (AT&T, MCI, Sprint) to Pay Phone Service Providers for all non-emergency calls originating from pay phones.
