Read 5 comments and you should realize what the people want.

Just because people don't explicitly say that this merger would be catastrophic to the current system and create a monopoly does NOT mean they are supportive of it, like Cohen writes below.

"Virtually all commenters recognize and concede either explicitly or through their silence that the transaction will deliver substantial consumer welfare and public interest benefits to residential and business customers and in the advertising marketplace," Cohen wrote.

The American people will not sit idly by and let this monopoly be formed.
