Reference: FCC DA 14-1292 - PS Docket No. 14-148

I am writing this letter on behalf of the West Chester Fire Department's for their support of ACD Telecom's request to be a certified frequency coordinator for the Part 90 Public Safety spectrum.

ACD Telecom's focus on improving public safety communications establishes that they are more than qualified for approval.

In my opinion, ACD Telecom surpasses the criteria established by the FCC for selection and certification of PLMR frequency coordinators. Thus, I feel they are more than capable of handling the role of frequency coordinator. The addition of ACD Telecom as a frequency coordinator would allow public safety agencies more options and a better standard of frequency coordination.

↓ **Its nationwide coordination capability**

ACD Telecom's extensive and diverse lists of positive project references leaves no doubt that their services are held to no geographic boundaries. ACD's willingness to work with clients nationwide, including having geographically diverse offices, places them in the top tier of availability and capability.

↓ **The entity's overall coordination plan (including how recommendations would be made and equality of applicant treatment)**

ACD Telecom has held the highest level of regard and workmanship in their dealings with us and the entire public safety community in Pennsylvania.

↓ **Representativeness of the users of the frequencies to be coordinated**

ACD Telecom's demonstration of their understanding and advocacy of better critical communications proves their commitment to public safety.

↓ **The entity's experience coordinating frequencies in the service or technical expertise**

ACD Telecom has established a Grade-A working relationship with the public safety community within Chester County. Ali Shahnam and their staff's vast background in frequency coordination allows ACD Telecom to coordinate with due diligence, and make methodical and thorough recommendations. This experience is proven in the company's dealing with Chester County's communications projects.

In closing, I believe ACD Telecom will be a valuable asset to public safety agencies nationwide, and bring effective and competitive skills to frequency coordination of the public safety spectrum. Again, they are very thorough, meticulous and careful in their frequency coordination work. Their certification will definitely benefit all public safety entities by diversifying and adding better customer service to the process.

Sincerely,

A handwritten signature in cursive script that reads "Dale McClure".
