**Re: *Protecting and Promoting the Open Internet, GN Docket No. 14-28;*
*Framework for Broadband Internet Service, GN Docket No. 10-127***

Dear Ms. Dortch:

On Monday, September 29, 2014, Krista Witanowski, Assistant Vice President, CTIA – The Wireless Association® (“CTIA”) shared via email with Ruth Milkman, Renee Gregory, Jonathan Sallett, Gigi Sohn, Daniel Alvarez, Roger Sherman, Jim Schlichting, Nese Guendelsberger, Joel Taubenblatt, Julius Knapp, Walter Johnston, Louis Peraertz, Rebekah Goodheart, Matthew Delnero, Stephanie Weiner, David Goldman, Priscilla Argeris, Brendan Carr, Nicholas Degani, Erin McGrath and Amy Bender of the Federal Communications Commission, the attached infographic in the above noted dockets comparing what the mobile ecosystem looked like in 2010 and 2013.

The facts noted on the infographic are clear: the wireless industry is robustly competitive and innovative, and is working for Americans and America’s economy. The FCC, in 2010, chose a light-touch mobile specific approach to its Open Internet rules and should do so again so that Americans can continue to benefit from record-setting investment and innovation that characterizes the mobile ecosystem.

Pursuant to Section 1.1206 of the Commission’s rules, a copy of this letter is being filed in the above captioned dockets in ECFS. Please do not hesitate to contact the undersigned with any questions.

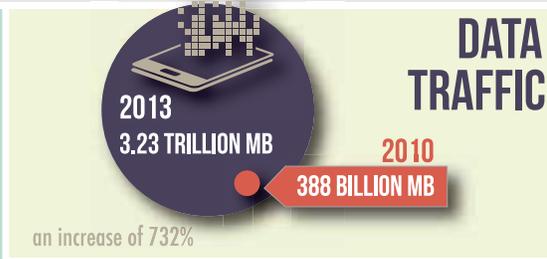

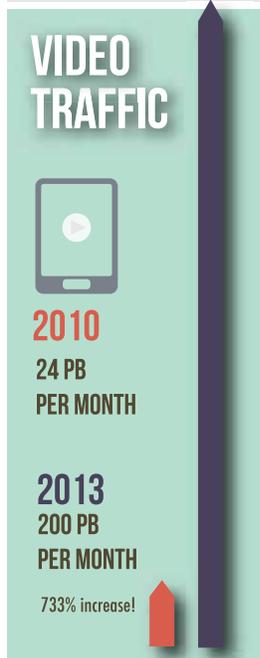

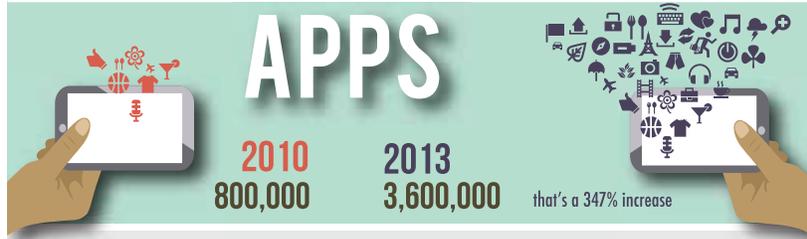

Sincerely,

/s/ Krista Witanowski

Krista Witanowski
Assistant Vice President – Regulatory Affairs
CTIA-The Wireless Association®

Attachment

The FCC, in 2010, chose a light-touch mobile-specific approach to Open Internet rules. Americans benefitted with record-setting investment and innovation throughout the entire mobile ecosystem.

The facts clearly show the wireless industry is robustly competitive and innovative, and is working for Americans and America's economy. So why should the government change the rules now and apply rules designed for public utilities or different technologies to this vibrant platform?
