DO NOT let these asshole corporations fuck up one of the last good things we have. I'm tired of corporations fucking with politics and if you people in the government let these Cable companies bust their metaphorical loads in our government by forcing a bill to change the system I swear I will go ape shit.

Net neutrality allows startups to form more freely, supports flow of commerce on the net (and thereby helps out America's economy) and most importantly KEEPS THESE MONOPOLIZING FUCKS AT BAY. It is the shared opinion of a VAST majority of Americans that the monopolies of Comcast and Time Warner should have been busted long ago.

My message to those CEOs and high level members of cable companies who would use any means to detriment the quality of net neutrality that the American public enjoy is this:

Go to hell.

My message to politicians everywhere is this: make the right choice. You've sworn that you love this country. You've sworn to protect the interests of the people you represent - your high school buddies, your family, everyone. You know that any bills that would hurt net neutrality in any way are vehemently opposed by a majority of the populace everywhere. So do your part. We know you can. Support the interests of the people you love and remain loyal to your country by voting "NO" on any bill that would thwart net neutrality. I thank you for your patriotism and commend you for your courage in representing the American people.
