FAO: Mr J Knapp, Chief, OET.

TV Whitespace database authorisation

Dear Mr. Knapp,

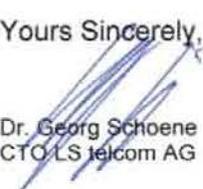

RadioSoft Inc., having acquired all of the TVWS business of Frequency Finder Inc., a provisionally authorised TVWS db provider, has become a wholly owned subsidiary of LStelcom AG, which is an approved TVWS database administrator.

LS telcom AG wishes to provide RadioSoft Inc. with an exact copy of its FCC approved TVWS database, allowing RadioSoft to rebrand the appearance of the website but not alter any functionality of the site or system. As the IT server platform was a recent concern to the FCC, we like to give notice that the current host of LS telcom's TVWS database is Amazon Web Service located in the USA, and this platform would identically be used also by RadioSoft Inc.

RadioSoft Inc. would carry out all commercial delivery of TVWS services under its own brand and service offering. Maintenance, support and development of the TVWS database used by RadioSoft will be carried out by LS telcom AG. As there are no material changes to the calculation, structure or operation of the database, we wish to minimise the effort required by the FCC to authorise RadioSoft to operate the TVWS database.

LS telcom AG wishes to continue as an FCC authorised database provider in the USA and remain authorised with the FCC to provide TVWS database capabilities.

Yours Sincerely,

Dr. Georg Schoene
CTO LS telcom AG
