Re: MB Docket No. 14-57

Dear Chairman Wheeler:

On behalf of the Monmouth-Ocean Development Council (MODC), I appreciate this opportunity to comment about Comcast's proposed transaction with Time Warner Cable.

MODC is dedicated to enhancing the quality of life and business environment in Monmouth and Ocean Counties, New Jersey, and our membership consists of hundreds of the most influential business, community and government leaders around the bi-county region. Many of our members have come to trust Comcast's Business Internet service to power their organization's communications needs.

Business owners understand that working on a larger scale can frequently enable them to compete more efficiently. Comcast's proposed merger with Time Warner Cable will accomplish just that for the combined company -- operating across a larger footprint, allowing it to spread costs over a larger customer base, and ultimately benefitting its customers.

We have already witnessed how Comcast has expanded its business services in an effort to compete in this critical enterprise market. The proposed merger should further strengthen the company, and advance overall competition.

With this in mind, we wish to offer our support of Comcast's transaction with Time Warner Cable, and we respectfully encourage the FCC to consider granting its approval.

Benjamin Waldron
Executive Director
