Please do not allow a merger between Comcast and Time Warner. It does nothing for the consumer. American ISP's have some of the slowest speeds and charge the highest amounts in the world. As a consumer I don't have many options due to lack of competition in the last mile of delivery. These carriers were given defacto exclusive franchise and now are to be given unfettered control, historically this is not how we have conducted business with monopolies. The FCC is the active control for the people of America please act in our interests not your last employer, largest contributor or whatever money interest you have experienced. Thank you.
