This is in regard to the reassignment of the TV broadcast spectrum. Currently, and for much of my life, I have watched broadcast TV through the public airwaves. I hope the availability of this service does not change through FCC actions. I am now able to get HDTV signals with a rooftop antenna plus an amplifier: 2 CBS channels, 2 Fox channels, PBS, NBC, (and often ABC, depending on weather and other interference). I live in the central part of America's 8th largest city. I am not able to get a clear signal for CW. There are several other stations and channels I can receive which do not interest me. Again, I hope the FCC takes no action which would impede my ability to receive TV over public airwaves.
