Below is an email we received regarding once again our lack of being serviced with an adequate internet provider. We are once again left with NO service. We should have the ability to receive the same service others that live in less remote areas. We are trying to run a business from our homes and it is very difficult. Thank you.

Linda,
Sorry for the delay in getting back to you.
I have bad news.
We cannot stretch our signal any farther at this time.
It will cost about \$ 40,000 to put in new Fiber Optics to get you service.
There are plans in the future to that on our end but that might be a couple of years.

Sorry
