

United States Senate  
WASHINGTON, DC 20510-2202

August 22, 2014

891

The Honorable Tom Wheeler  
Chairman  
Federal Communications Commission  
445 Twelfth Street, SW  
Washington, DC 20554

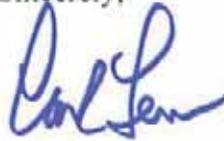

Dear Chairman Wheeler:

As the Federal Communications Commission considers how to revise its rules for an open Internet in response to the January 2014 ruling of the United States Court of Appeals for the District of Columbia Circuit, I write in strong support of net neutrality rules that guarantee an open and free Internet.

It would appear that the reclassification of broadband Internet access services as a Title II telecommunications service is the best and clearest way to ensure an open and free Internet. But, however you chose to get there, the important thing is that the FCC does get there. We must continue to have rules that protect the Internet from becoming a tiered system favoring some over others, as such an outcome would stifle innovation.

I encourage you to adopt rules that will clearly retain an open and free Internet that our people have come to rely on.

Sincerely,

A handwritten signature in blue ink, appearing to read "Carl Levin".

Carl Levin

OFFICE OF  
THE CHAIRMAN

FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON

October 17, 2014

The Honorable Carl Levin  
United States Senate  
269 Russell Senate Office Building  
Washington, D.C. 20510

Dear Senator Levin:

Thank you for your letter about the need for the Commission to restore rules to protect the Open Internet. I share your concerns. Since the D.C. Circuit's decision in January, there are no rules in place to prevent a broadband provider from engaging in conduct harmful to Internet openness, such as blocking a consumer from accessing a requested website or degrading the performance of an innovative Internet application. The Open Internet is too important to leave consumers and innovators unprotected. We must reinstate strong, enforceable Open Internet rules, and we must do so with dispatch.

As you know, in May, the Commission adopted a *Notice of Proposed Rulemaking* ("Notice") to begin that process. We asked a fundamental question: What is the right public policy to ensure that the Internet remains open? And we sought comment on the best way to achieve that fundamental policy goal. The response has been remarkable: Over 3.7 million comments were filed by the close of the comment period on September 15, 2014. This record-setting level of public engagement reflects the vital nature of Internet openness and the importance of our getting the answer right in this proceeding.

Your letter touches on key issues in the *Notice*, and it will be included in the record and considered as a part of the Commission's review. You call on the FCC to "continue to have rules that protect the Internet from becoming a tiered system favoring some over others, as such an outcome would stifle innovation." I wholeheartedly agree. The purpose of our Open Internet rules will be to protect and promote the Open Internet, including eliminating discrimination that harms consumers, competition, and free expression.

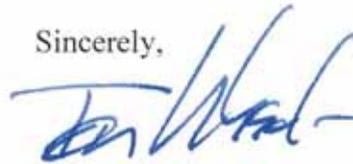

With respect to your thoughts about the legal foundation for our rules, the Commission is considering several options, including Section 706 and Title II of the Communications Act. The *Notice* specifically asks questions about these approaches, including whether the Commission should revisit its classification of broadband service as an information service or whether we should separately identify and classify under Title II a service that "broadband providers... furnish to edge providers." For approaches involving a Title II classification, we also ask about how our forbearance authority should be used to tailor Title II obligations to achieve our public policy goals. Since the *Notice*, record filings by some parties – such as AOL, Mozilla, the Center for Democracy and Technology, a coalition of library and higher education associations, Rep. Henry Waxman, and others – have suggested additional approaches that would combine

aspects of both our Section 706 and Title II authority. We are looking closely at these approaches as well. This reflects what I have said many times, most recently before the House Committee on Small Business: All options remain on the table, including Title II.

Our *Notice*, of course, is just the beginning. We held Open Internet Roundtable discussions last month, focused on the scope of our Open Internet rules and on whether and how they should apply to mobile broadband, including the application of reasonable network management to wireless technologies. I was also pleased to participate in Roundtable discussions about how to tailor our rules to achieve our policy goals, enforcement, technology, economic theory, and, most recently, legal authority. Through these events, we have heard views of experts on all sides of the issue, along with real-time input from the public. At the same time, a cross-Commission staff team is hard at work reviewing the many comments filed over the last four months. Our efforts will ensure that all views are taken into account as the Commission looks to adopt sustainable rules that achieve our shared Open Internet goals.

From the outset of this critically important undertaking, I have been and remain committed to exercising the Commission's authority, as needed, to ensure the Internet remains free and open for decades to come. I look forward to continued engagement with you as the proceeding moves forward to a successful conclusion.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tom Wheeler", with a stylized flourish at the end.

Tom Wheeler
