Grant is a community that is certainly deserving of a first FM service. "Local radio stations play an important role in their communities, providing local news, information and entertainment to residents, and generally serving as good corporate citizens in the local community life. This is particularly true in smaller towns where the radio stations are limited in number. Yet there are still rural areas of our country that do not have even a local radio station."⁸ The proposed channel 286A will provide additional diversity and an outlet for local self-expression to Grant residents and therefore is in the public interest.
