Dear FCC Commission,

Please, please protect net neutrality by strictly regulating internet service providers. Please reclassify ISPs such as Comcast and Verizon under Title II of the Communications Act. Please prohibit carriers from blocking Web traffic or favoring some services over others. These monster companies like Comcast and T-Mobile and Sprint are so huge they rip little guys like me off. They charge unbelievably and unreasonably high rates for a string of electrons flowing through a cord. I personally wish the government would provide free or extremely low cost internet service to everyone and shut these huge companies down. Thank you very much.
