The actions of the FCC , CBS Corp, ION tv, and Meredith Corporation in this case are an outrage. The overlap of channels claimed is either de minimus or nonexistent, depending on how you analyze it.

Having a MeTV affiliate in the New jersey/New York/ Hudson Valley market that clears virtually the entire MeTV schedule, rather than air infomercials virtually 50% of the time, is clearly in the public interest, as will be the New Jersey oriented programming the licensee has planned for the next several months, which will benefit a truly huge but heretofore ignored group of viewers.
