

Dear FCC,

Please save our Internet while there is still time! I have an Internet provider name 'EXEDE' Internet, and they are taking away all my freedom over the net! I'm currently a college student with software development for a Major. I cannot access the resources I need because my Internet provider limits my Internet to only 10 GB's of Data each month. I get thrown off the Internet if I go over this limit. Further more my Internet speeds over all are horrific. If I need to watch one tutorial I had better go to a public library, because it is faster then trying to load it at home. I can see where this Net Neutrality is going. Save our freedom. Don't allow large companies to buy priority over others! It will ruin the Internet and demolish all the little guys. Think about it, everyone needs a place to start, regardless of size. If company's like time warner can buy priority though the next company will never get the chance to rise up. Please make the right choice here. ban metered Internet and prioritizing Internet!
