RE: Restoration of servicer from MeTV Channel 3.10 (Antenna Signal) New York City area

“MeTV” Channel 3.10 is a most enjoyable, and viewed station by many in the New York City area. I am most sure that many viewers have contacted the FCC (and/or the station In New Jersey) to insist that MeTV be restored for the New York City, and New Jersey area. I speak for at least twelve (12) of my relatives who were most shocked, and disappointed that the station was forced, FORCED, to cease broadcasting. MeTV should immediately be restored. It was one of the three most popular stations in the tri-state (New York, New Jersey and Connecticut), if not number one. Again, MeTV should immediately be restored!
